Social Media Marketing: Changing the Face of Marketing in India

Savita

(M.Com, Kurukshetra University, Kurukshetra)

Abstract: *today, we are in 21st century and people do not find time to come & interact with each other. Social media helps in connecting themselves with social networking sites through which now people can stay far and yet remain connected. Apart from this media like Facebook create a loyal connection between product and individual which leads to large advertising opportunities. Similarly, other social media like Blogs create a platform to post comment on any event which needs to be publicized also can be utilized as a promotional technique for customer's adoption as well as for promotions. Now users are acquiring followers & subscribers and directing them to your social networking page. These media has an competitive edge over other popular public media like Television because there is a time gap between social event occurrence and the time it is being broadcasted. Companies not engaging in social media as part of their online marketing strategy are missing an opportunity to reach consumers.*

This study is an attempt to create awareness among Indian marketers about the power of SM Environment spreading at large. The study has used secondary sources of information from different websites and it is an exploratory in nature. This study answers one major research question – What is the state of social media marketing in India? And so to unravel this question, the study provides all major facts, figures, major research findings and some popular case study examples. Major findings show that social media platforms do have an impact on business and marketing. SM, primarily, is to be used for engaging consumers.

Keywords: *Social media, social media marketing, Facebook, Twitter, Google, Whatsapp.*

I. INTRODUCTION

Social media marketing is the use of social media platform and websites to promote a product or service. Although the term e-marketing and digital marketing are still dominant in academia, social media marketing is becoming more popular for both practitioners and researchers. Most social media platforms have built-in data analytics tools, which enable companies to track the progress, success, and engagement of ad campaigns. Companies address a range of stakeholders through social media marketing, including current and potential customers, current and potential employees, journalists, bloggers and the general public. On a strategic level, social media marketing includes the management of a marketing campaign governance, setting the scope (e.g. more active or passive use) and the establishment of a firm's desired social media "culture" and "tone". When using social media marketing, firms can allow customers and internet users to post users-generated content (e.g. online comments, product reviews etc.) also known as "earned media", rather than use marketer-prepared advertising copy.

Social media enables businesses to establish huge user network, sharing their content, opinion, view, and encouraging interaction and community building via social channels like Twitter, Facebook, Digg, Stumble Upon and more. Brainpulse, an expert social media marketing services provider offers a wide range of social media marketing services and online content distribution network to develop a rewarding communication platform between sellers and consumers. There is an excellent example to prove the above statement. India is called the country of three C's: Cricket, Cinema, and Congress. India loves Cricket and its cricket stars. India is among the few countries where its own film industry, better known as Bollywood beats Hollywood. Also, Congress has been a long time darling of India as far as politics is concerned. It goes without saying, that India follows what the three C's follow. It came as no surprise to me when India's top movie stars like Shahrukh Khan, Priyanka Chopra, Abhishek Bachchan etc. joined Twitter to market their movies.

But, the fact that Bollywood's highest earning movie, 3 Idiots releases on YouTube just three months after its Global release does signal Bollywood's new found love in YouTube. Congress embraced this new age media by creating fan pages for Rahul Gandhi and the Indian Prime Minister, Dr. Manmohan Singh. Shahi Tharoor has over 600,000 followers on twitter and his „human“ tweets make sure, he is in the news at all times. Our own Honourable Chief Minister Mr. Narendra Modi won a prize for social media. Last but not the least, IPL 3.0 will be telecasted live on YouTube. This can be considered the ultimate tribute of the IPL to the new age Indian who loves YouTube as much as he loves cricket.

II. OBJECTIVE & METHODOLOGY

The objective of this study is to know the state of social media marketing in India. How the Indian companies respond to this new media? This study provides significant facts and figures based on relevant research studies & literature. The study has used secondary sources of information.

III. METHODS OF DATA COLLECTION

Various information has been collected by referring books, journals, newspapers, articles, research reports, dissertation, research papers, websites, online journals etc.

IV. SOCIAL MEDIA MARKETING PLATFORM

A. Facebook

- 1) India has world's largest number of Facebook Users with over 195 million users, overtaking US by over 4 million subscribers.
- 2) There are 155 Million Monthly Active Users (MAUs) in India, of which 147 Millions MAUs access Facebook via Mobile Phones and 73 Million users are active daily on Mobiles.
- 3) Top 5 countries accessing Facebook are India, USA, Brazil, UK and Germany.
- 4) Key Facebook Users from India are aged 18-24, which is the largest and fastest growing population segment.
- 5) A users revisits Facebook more than 3 times in a day.
- 6) Indian users can access Facebook in 12 languages and 670 Million users are connected to at least one News Publishers page.
- 7) In India, 76% of Facebook users are Men, and 24% users are women, which illustrates the barriers women face in India to access technology and information.
- 8) [Most popular Indian Brand on Facebook](#) is Aaj Tak with 14.4 million global fans.

- 10) Top 5 brands on Instagram are Nike, Starbucks, NBA, Adidas Originals & TopShop.
- 11) 48.8% of brands are currently on Instagram, by 2017 it is expected to touch 70.7%.
- 12) The average users post engagement rate of Instagram is 3.31%, while Twitter has an average of 0.07% only.

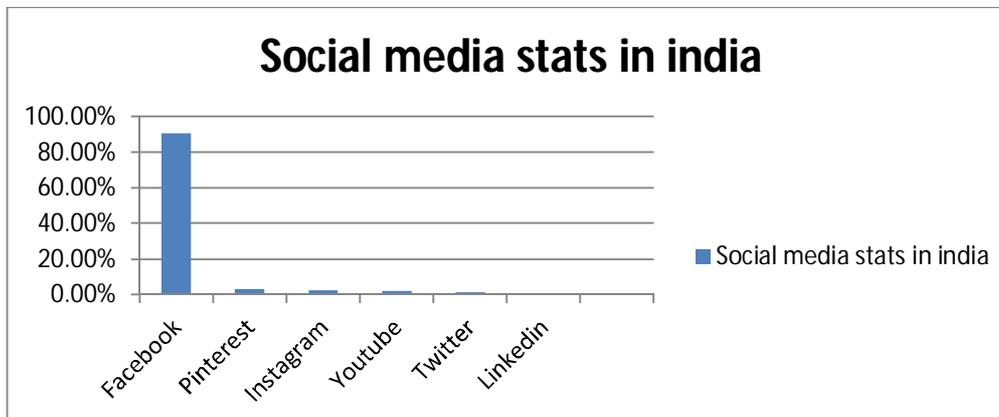

V. PURCHASE INSPIRATION

Source: from google

From the study of the above data it is clear that the social networks are the main reason which inspire customers to purchase which is 37% and the least is digital press and magazines which inspire only 6% to the customers.

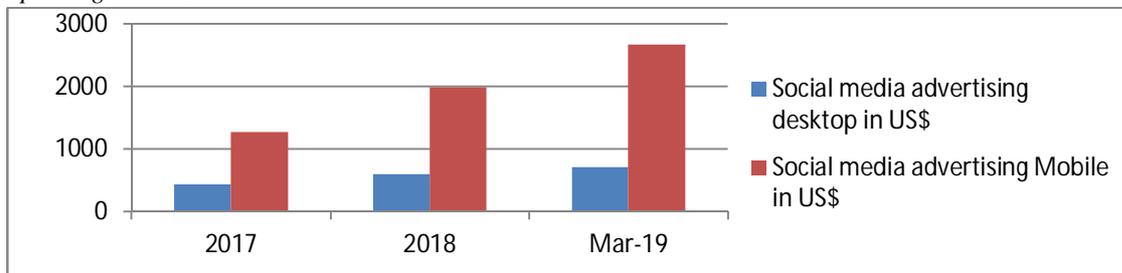

A. Social Media Stats In India- March 2019

Source: from google

Mostly used social media is Facebook which is 90.31% and the least used social media marketing tools is LinkedIn which is only 0.08% of the total population of India. So the most profitable tool for marketing of the products is the Facebook.

B. ADs Spending In India

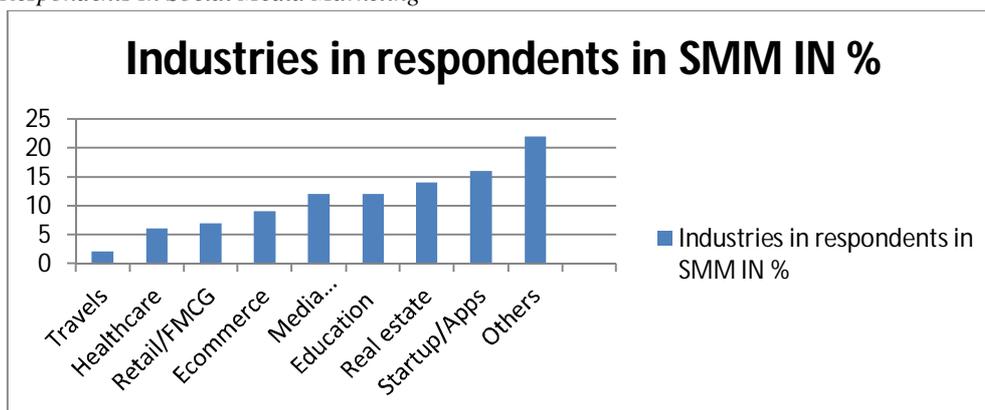

Source: from google

The spending on mobile advertising is continuously increasing from 2017 to march 19 from 1261.2m US\$ to 2666.0m US\$ which is more than double. Also the spending is more on mobile sending than sending on desktop advertising.

- 1) 88% of social marketers said that it's important for their brands to provide customers services through social media.
- 2) Social media advertising has become more accessible and affordable- think Facebook and Instagram promotions starting for as little as INR 40 a day, while Snapchat slashed their prices to \$ 2.95 (INR 200) for a 1000 views earlier last year.

C. Industries Of Respondents In Social Media Marketing

Source: from google

D. The Oddball Viral Star

The internet hive mind has a way of throwing up surprises, especially when all it takes as one viral video to make someone famous. And they don't have to fit into the cookie cutter mould of how social media influencers tend to look and behave. For example:

This professor named Sanjeev Srivastava from Vidisha in MP was filmed doing what he loves most – dancing with abandon at a wedding and become an overnight viral sensation earlier this year. The “DANCING UNCLE”, as netizens dubbed him, has been written about by news outlets across the world, has met a bevy of Bollywood celebrities and has been signed on by Bajaj Allianz for an ad campaign, all while rocking a safari suit.

E. Importance Of Social Media Marketing

- 1) *Increase Product & Brand Awareness:* Marketing on social networking sites will increase awareness by increasing the online presence of your products and brand. When the company creates a group or organizes a promotion on a social networking site, the members are reminded of your brand and website with every interaction. Since the customers are deciding what groups they want to join and what information they want to receive, this information is usually received.
- 2) *Increase Web Traffic:* Communications, recommendations, and other postings on social networking sites often contain web links. If the company is mentioned and a link is included, these postings drive traffic to your site, increasing brand and product awareness. Due to the makeup of social networking sites, these links are naturally targeted to potential customers that are interested in the company, products, or services.
- 3) *Increase Customer Loyalty:* If done correctly, promoting the company or products by building a social network can greatly enhance customer loyalty. If participation of the company is consistent and honest, adds value by supplying useful content, and appears personal, it will greatly enhance company's reputation while building trust and credibility. Offer help first, and promote products only when asked and when appropriate; otherwise your attempts could be considered spam.
- 4) *Increase Success of New Product Launches:* Social networks provide a unique opportunity to survey the relevant community on their products wants and needs. The community can guide and participate in the product development process. Giving them a voice in the process can increase loyalty and guarantee success when a new product is launched. Users of social networking sites profile themselves upon joining a network. These profiles can be very detailed, and their purpose is to help the user connect with others who share similar interests and activities. The profiles contain, not only basic information about the user, but also information on their education, areas of technical expertise publications, memberships in other groups, geographic location, and job position (among other information). For marketers, this information is invaluable as it can be used to develop highly targeted marketing messages.
- 5) *Others*
 - a) Social media can be used to provide an identity about the companies and the products Or services that they offer.
 - b) Social media helps in creating relationships with people who might not otherwise know about the products or service or what the companies represent.
 - c) Social media makes companies "real" to consumers. If they want people to follow them they need not just talk about the latest product news, but share their personality with them.
 - d) Social media can be used to associate themselves with their peers that may be serving the same target market.
 - e) Social media can be used to communicate and provide the interaction that consumers look for.

VI. CONCLUSION

Social platforms each have an ecosystem of their own. Creating a basic social media presence is easy enough, getting your community to actually do something is more difficult. Make sure your site is included in local business directories in order to help ensure that consumers find you when they need you. Customizing messages across sites help the message spread but it keeps users from receiving multiple identical communications. By giving exclusive coupons to your social community, you're rewarding and reminding them that you are not only a brand to engage with, but also to buy from. Taking advantage of these strategies can help you build your community, make your marketing more effective, and incentivize buying.
