Abstract: *Print media advertising is a form of advertising that uses physically printed media, such as magazines and newspapers, to reach consumers, business customers and prospects. Advertisers also use digital media, such as banner ads, mobile advertising, and advertising in social media, to reach the same target audiences. Aim of this research paper is to analysis the effect of print advertising on consumer of cashew day and identify the sources of information on consumer about cashew day. Primary data were collected through questionnaire from 100 respondents from the population of Bardoli city. And descriptive research design was used in the study. As per above study we get to know that cashew day is still lacking behind in advertisement. As most of the respondent doesn't know about cashew day print advertisement in Bardoli city. Those respondents who has known about cashew day are mostly know through social media and reference.*

Keywords: *Print Advertisement*

I. INTRODUCTION

Print media advertising is a form of advertising that uses physically printed media, such as magazines and newspapers, to reach consumers, business customers and prospects. Advertisers also use digital media, such as banner ads, mobile advertising, and advertising in social media, to reach the same target audiences. The proliferation of digital media has led to a decline in advertising expenditure in traditional print media, but print isn't dead. Advertisers can choose from a wide range of different types of newspapers, including local, regional or national titles published in daily, evening, weekly or Sunday editions. Newspapers target different readerships with a mix of content, often including sports, entertainment, business, fashion and politics in addition to local, national or world news. Advertisers can buy different sizes of advertising space, from small classified ads with text only, to display ads featuring text, photographs, illustrations and graphics in sizes up to a full page or even a double-page spread.

Magazines offer advertisers extensive choices of readership and frequency. Consumer magazines cover a wide range of interests, including sport, hobbies, fashion, health, current affairs and local topics. Many business and trade magazines provide coverage of specific industries, such as finance or electronics. Others cover cross-industry topics, such as communications or human resources, while still others focus on job-specific areas, such as publications for executives, marketing professionals or engineers. Publishing frequency is typically weekly, monthly or quarterly. As with newspapers, advertisers can take advertising spaces from classified ads to full page ads in black and white or colour.

II. REVIEW OF LITERATURE

Rashmikhatri (2016) Impact of Newspaper advertisements on consumer purchase behaviour. objective of the research wereto understand effectiveness of newspaper advertisements on consumer purchase. To understand the trust factor associated with different advertising media. To have a comparative analysis of advertising media on consumer purchase intent. Questionnaire Design: The questionnaire uses a Likert scale to analyze the responses of respondents on a scale ranging from strongly agree to strongly disagree For Analysis of the research they had used ANOVAs, t-test technique. Researcher was used 100 sample size. Finding of the study was the study found out the attribute of advertisements which consumer looks for in newspaper advertisements. This research showed that consumers look for price, brand, discount percentage, ease of getting the product, celebrity etc. Size of the ad does not help to influence the consumers. Major finding of this study is that newspaper is still one of the primary media for checking advertisements along other media like TV and internet.

Rajeev batra(1991) Consumer responses to advertising: the effects of ad content, emotions and attitude towards the ad on viewing time. The objective of the study was The ads studied represent a sample of commercials aired during prime-time broadcasts, and the effects are analyzed across the ads rather than across people. Researcher were used Research design Exploratory, correlation, regression and Simple random sampling. Researcher was used sample size 146 out of 150 respondents. The study was found encouraging because the tasks that respondents completed to collect the measures of zipping and zapping were fairly lengthy, we feared that any signal contained therein might be swamped by fatigue effects and other types of noise or error.

Aziz ahmedchaudhry, fuawad basher awan and syedshawarhussain(2017) Impact of print advertising on brand image and consumer buying behaviour. Objective of the study were to analyse and investigate the impact of print advertisement on enhancing the brand image and to identify and examine the influence of print advertisement on consumer buying behaviour. Researcher was used Correlation analysis, multiple regression analysis model and chi square test model. Collect data through questionnaires and simple random sampling. the sample size was used 161 respondents. The study was found Consumer buying intentions are always influenced through strongly relay on culture, changes their social aspects, fulfilled the requirements of personal and effect psychological characteristics as well.

Daniel heinrich and colinCampbell(2012) Is an advertising worth the paper it's printed on? The impact of premium print advertising on consumer perception. Objective of the study was the effect of premium-print advertising techniques on the key constructs of advertising impact and consumer behaviour through a field experiment using participants drawn from the general population. Researcher were used Research design Exploratory and correlation Simple random sampling. Researcher was used 357 sample size. The study was found tested advertisements employing premium-print technologies convey a greater sense of uniqueness and prestige than conventional advertising, boost consumer attitudes toward an advertisement as well as to ward the brand, and enjoy higher ratings on measures of willingness to buy, positive word of mouth, and consumer willingness to pay a price premium.

Mohitbansal and shubhamgupta (2014) Impact of newspaper advertisement on consumer behaviour. Objective of the study was The objective is to psychological impact of the newspaper advertisement on a consumer and that his assessment of the Effectiveness of the advertisement. Technique was used correlation. Sample size was 1017. A finding of the study was its impact can be accessed from the fact that advertisements with more informational content were found to influence more customers than advertisements with less informational content. The impact of informational content and its probability of being liked by a consumer were greatest for electronics and durable goods.

Ludmlacabyova, peter krajcovic. (2017). the influence of selected factors on the effectiveness of print media advertising. Objective of the study was they compare the effect of the size and position of advertising, the reasons for recall and they also focus on the influence of buying intention and the stage of the buying process on Advertising effectiveness. Technique was used Rank order and observation Simple random and judgment. Sample size The survey involved 30 respondents. Finding of the study was the results suggest that the internet and TV had the biggest influence on choosing and buying products and services. On the contrary, radio and newspapers had the smallest influence.
