A Study on Awareness and Perception of Consumers towards GST with Special Reference to Restaurants in Bengaluru City

Mr. Chittibabu C¹, Mr. Arun Kumar B.C²

¹Assistant professor, Department of Commerce, Silicon City College of Management and commerce Affiliated to Bangalore University, Bengaluru

²Assistant professor, Department of Commerce, SJB College of Management Studies Affiliated to Bangalore University, Bengaluru

Abstract: In India different kind of indirect taxes applied on goods and services by central and state government like Sales tax, VAT, Service tax, excise duty, entry tax etc., In the year 2017 Goods and Services Tax (GST) implemented all over the country with an intention of one nation, one tax and one market. The GST subsumed all the indirect taxes including taxes levied in restaurants like service tax, VAT etc. Taxes levied on services is a major contributor to government revenue. GST implementation has made an impact on consumers who pay taxes on services provided by restaurants. The objective of the study is to find out the level of awareness and perception of consumers on GST in restaurants. The study used descriptive research design. A sample of 100 consumers from different restaurants were randomly taken from the Bengaluru city. Both Primary and Secondary sources were used within the study. Data collected were analyzed by using frequency and percentages and findings are interpreted accordingly.

Keywords: Goods and Services Tax (GST), Awareness, Perceptions.

I. INTRODUCTION

The tax system in India classified in two, namely Direct and Indirect taxes. Direct taxes are those taxes which are directly paid by individuals to Govt (income tax, Wealth tax, corporate tax) and indirect taxes are taxes on goods and services (Central and state sales tax, Custom duties, Value added taxes, excise duty etc.).

A. History of GST

On July 1st 2017, the Goods and Services Tax implemented in India But, the process of implementing the new tax regime commenced a long time ago. In 2000, Atal Bihari Vajpayee, then Prime Minister of India, set up a committee to draft the GST law. In 2004, a task force concluded that the new tax structure should put in place to enhance the tax regime at the time.

In 2006, Finance Minister proposed the introduction of GST from 1st April 2010 and in 2011 the Constitution Amendment Bill passed to enable the introduction of the GST law. In 2012, the Standing Committee started discussions about GST, and tabled its report on GST a year later. In 2014, the new Finance Minister at the time, Arun Jaitley, reintroduced the GST bill in Parliament and passed the bill in Lok Sabha in 2015. Yet, the implementation of the law delayed as it was not passed in Rajya Sabha.

GST went live in 2016, and the amended model GST law passed in both the house. The President of India also gave assent. In 2017 the passing of 4 supplementary GST Bills in Lok Sabha as well as the approval of the same by the Cabinet Rajya Sabha then passed 4 supplementary GST Bills and the new tax regime implemented on 1st July 2017.

B. Meaning of Goods and Service Tax (GST)

Clauses 366 (12A) of the constitution Bill defines GST as — goods and service tax means any tax on supply of goods, or services or both except taxes on the supply of the liquor for human consumption.

Further the clause 366 (26A) of the Bill defines Services means anything other than Goods.

Thus, it can be said that GST is a comprehensive tax levy on manufacture, sale and consumption of goods and services at a national level.

There are 3 types of GST, CGST - collected by Central Govt., SGST – collected by State Govt. and IGST- for interstate transaction. GST will remove cascading tax effects. ‘Cascading tax effect’ means tax on tax i.e. a consumer has to pay tax on tax.

C. GST Restaurant Bill

As an end consumer, we hardly pay attention to our food bill in these restaurants and most of us are not even aware of the components included in it. If you revisit your food bill from the pre-GST fine-dine experience, you'll find Service Tax, Service Charge, VAT being added over and above the food value.

The Goods and Services Tax was introduced to promote equitable distribution of tax revenue between the authorities and clear any confusion pertaining to the various indirect taxes, among other things. Since 2017, only three forms of Goods and Services Tax have been charged to the parties involved in trading a particular product or service, namely CGST, SGST, and IGST.

II. REVIEW OF LITERATURE

- 1) (Dr. G., 2019), in his study "Consumers' perception towards GST Rates in India" focuses on study the consumers perception towards GST rates in India and furnish the information regarding GST rates to the consumers. The study is totally based on secondary data. The relevant data is collected from newspapers, research studies, reputed journals, books and websites etc. In conclusion, GST is a step forward for India to integrate its market and systematically develop its economy as a whole.
- 2) (Abilash & D, 2021), In their study "A Study on Public Awareness towards Goods and Service Tax with Special Reference to Coimbatore City" The study focuses on measure the level of awareness of GST among consumers and to know the impact and opinion of consumers towards GST. This study result indicates that the awareness level of customers about GST is not up to the mark. The government has to put more effort to ensure that consumer have a clear understanding and develop a positive perception towards GST.
- 3) (Nitin Kumar, 2020), In this study "Customers Perception towards GST (Good & Service Tax) in Distt Jind, Haryana (India)" several identifiable variables were selected concerning tax knowledge, tax morale, tax compliance. Using questionnaire as a research instrument, 50 sets of questionnaires had been distributed. Multiple regression analysis was used to test cause of relationship among tax knowledge, tax morale, and tax compliance with tax payer's awareness on GST. This study highlighted the overall overview of GST in Jind Area of Haryana.
- 4) (MINU.C.G & JIJ.K, 2019), In this study "A Study on Consumer Perception Towards Goods and Service Tax" The aim of the study is to know the consumers awareness towards GST in Cherpulassery Municipality, Palakkad (Dist), Kerala after the implementation in India. The study found that the majority of the consumers are agreed that GST is a simple and transparent tax system and it helps to increase the revenue of the Government. The data for the study been collected from both primary and secondary sources. Primary data was collected by using questionnaire and schedules from 40 respondents from Cherpulassery municipality. The secondary data was collected from various sources like journals, Magazines and web site etc. The sample size for the study is 40 respondents.
- 5) (Krishan Kumar, 2017), in this study "A Study on Customers Perception towards GST (Goods& Service Tax)", focuses on Analysis customers perception regarding Goods and Service Tax (GST) and to find out the perception and their views on new implemented taxation system. This study highlighted the overall overview of GST. Good understanding among customers is important as it can generate a positive perception towards taxation policy.
- 6) (Dr Sandip S Tapkir & Ms Jyoti Peswani, 2019), In this study, "A Review of GST effect on the Food consumers in the Restaurant with in the Pune City.", understand the concept of Goods & Service tax and to obtain a comprehensive overview of consumer's awareness and perceptions of GST. 83% responded that they are aware about GST and 17% said that they have at least some idea about GST. 80% of the respondents believed that the introduction of GST has no impact on their frequency of eating out and 20% stated that it has impacted their frequency of eating out

III. OBJECTIVES OF THE STUDY

- 1) To study the awareness level of consumers towards the GST in Restaurants.
- 2) To find out the consumers perception towards GST.
- 3) To analyze the satisfaction level of consumers towards the GST in Restaurants.

IV. NEED OF THE STUDY

Most of the consumers are unaware of GST applicability and rates on various goods and services and also, they are confused with tax rates charges on the food, beverages and services in the different restaurants. Not only that some of the restaurants are charging different rate of GST on their food, beverages and services when comparing with other restaurants, which resulting in restaurants fooling the customers by charging high rate or different rate of GST.

Hence, there is a need to provide the awareness to the consumers on the GST in restaurants.

V. RESEARCH METHODOLOGY

The study is used descriptive research. It describes the situation or phenomenon. Survey method used in the study to collect responses from customers in different restaurants. The data for the study been collected from both primary and secondary sources. Primary Data was collected by using questionnaire technique. The questionnaire was collected on 100 respondents belonging to Bengaluru city. The sample was selected by using random sampling technique from the population belonging to different demographic profile like gender, age, education and occupation. Secondary data was collected through internet, website, research journals and published books etc.

VI. DATA ANALYSIS AND INTERPRETATION

The data collected from various respondents to analysis and interpret the conclusion. The data collected have been presented in the form of tables and graphs. A brief description of analysis and interpretation are given below:

Table 1: Number of Respondents on the basis of Gender

Sl. No	Gender	No. of Respondents	Percentage
1	Male	63	63
2	Female	37	37
3	Others	00	00
Total		100	100

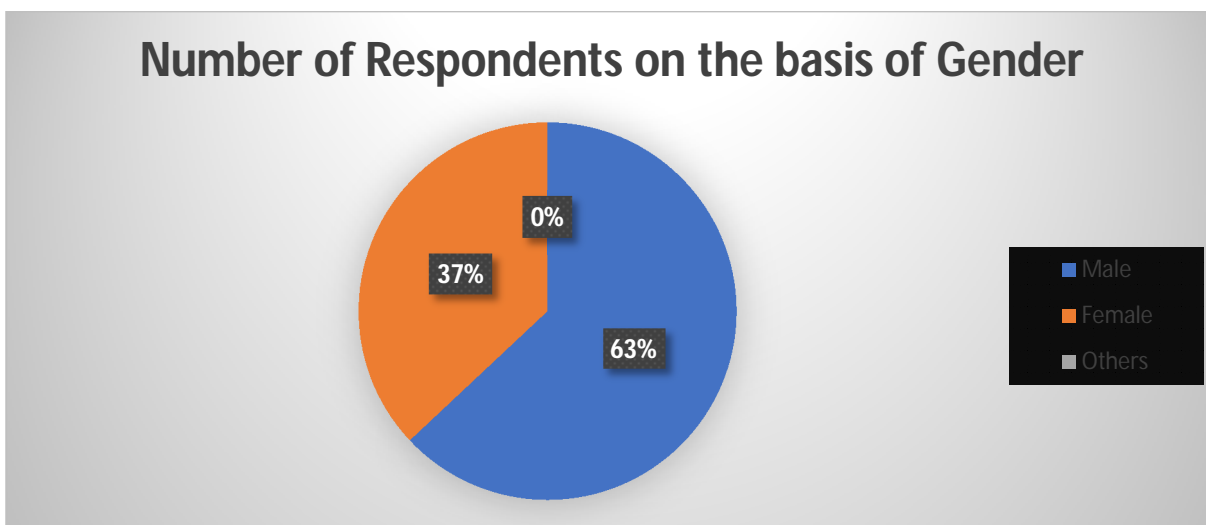

Figure 1: Number of Respondents on the basis of Gender.

1) *Interpretation:* As per the above table and graph it can be observe that, among all the respondents 63% respondents are male and 37% respondents were female.

Table 2: Number of Respondents on the basis of Age

Sl. No	Age	No. of Respondents	Percentage
1	Below 25 Years	36	36
2	25 – 60 Years	57	57
3	Above 60 Years	07	07
Total		100	100

Figure 2: Number of Respondents on the basis of Age.

2) *Interpretation:* From the above table and graph, it is observed that among all the respondents 36% are below 25 years of age group, 57% respondents belong to 25 – 60 years of age group and 7% of the respondents fall in the above 60 years of age group.

Table 3: Number of Respondents on the basis of Education

Sl. No	Education	No. of Respondents	Percentage
1	Primary Education	19	19
2	Secondary Education	14	14
3	Degree Holders or UG	45	45
4	Master Degree Holders or PG	8	8
5	Above Master Degree Holders	2	2
6	Illiterate	12	12
Total		100	100

Figure 3: Number of Respondents on the basis of Education.

3) *Interpretation:* From the above table and graph, it can be observed that among all the respondents 19% belongs to primary education group, 14% respondents belong to secondary education, 45% of the respondents belong to Degree graduates, 8% respondents belong to PG, 2% of the respondents belong to above PG education group and 12% of the respondents has no education qualification.

Table 4: Number of Respondents on the basis of Occupation.

Sl. No	Occupation	No. of Respondents	Percentage
1	Government Employees	16	16
2	Private Employees	47	47
3	Business Persons	28	28
4	Students	12	12
5	Unemployed	07	07
Total		100	100

Figure 4: Number of Respondents on the basis of Occupation.

4) *Interpretation:* From the above table and graph, it is observed that among all respondents 16% belong to Government employee group, 42% respondents are employed in Private institutions or organizations, 27% of the respondents are business people, 12% of the respondents are students and 3% of the respondents are unemployed.

Table 5: Number of Respondents on consumer awareness about GST in Restaurants

Sl. No	Response	No. of Respondents	Percentage
1	Yes, Fully aware	64	64
2	No, Not aware	15	15
3	May be, not sure	21	21
Total		100	100

Figure 5: Number of Respondents on consumer awareness about GST in Restaurants.

5) *Interpretation:* From the above table and graph, it is observed that out of 100 respondents 54% of respondents are actually aware about GST charged in restaurants, 15% of respondents are completely unaware about GST and 31% of respondents are are not sure about GST charges in restaurants.

Table 6: Number of Respondents on consumer satisfaction with regard to GST in Restaurants

Sl. No	Response	No. of Respondents	Percentage
1	Highly Satisfied	05	05
2	Satisfied	17	17
3	Dissatisfied	42	42
4	Highly Dissatisfied	15	15
5	Neither Satisfied nor Dissatisfied	21	21
Total		100	100

Figure 6: Number of Respondents on consumer satisfaction with regard to GST in Restaurants.

6) *Interpretation:* From the above table and graph, it is observed that among all the respondents 5% and 17% of the respondents are satisfied with regard to GST in Restaurants. Majority of the respondents i.e., 42% and 15% of respondents are Dissatisfied and 21% of the respondents are Neither Satisfied nor Dissatisfied with regard to GST in Restaurants.

Table 7: Number of Respondents on consumer perception regarding GST is a very good tax reforms for India.

Sl. No	Response	No. of Respondents	Percentage
1	Strongly Agree	28	28
2	Agree	40	40
3	Neutral	8	8
4	Dis Agree	16	16
5	Strongly Dis Agree	8	8
Total		100	100

Figure 7: Number of Respondents on consumer perception regarding GST is a very good tax reforms for India.

7) *Interpretation:* The above table and graph shows that among all the respondents 28% are strongly agree and 40% are agree with this statement, 8% of the respondents are neutral, 16% of the respondents dis agree and 8% are strongly dis agree with the statement. So, it is concluded that majority o the consumers said that GST is a very good tax reforms for India.

Table 8: Number of Respondents on consumer perception regarding GST has increased tax burden on consumers.

Sl. No	Response	No. of Respondents	Percentage
1	Strongly Agree	18	18
2	Agree	47	47
3	Neutral	24	24
4	Dis Agree	08	08
5	Strongly Dis Agree	03	03
Total		100	100

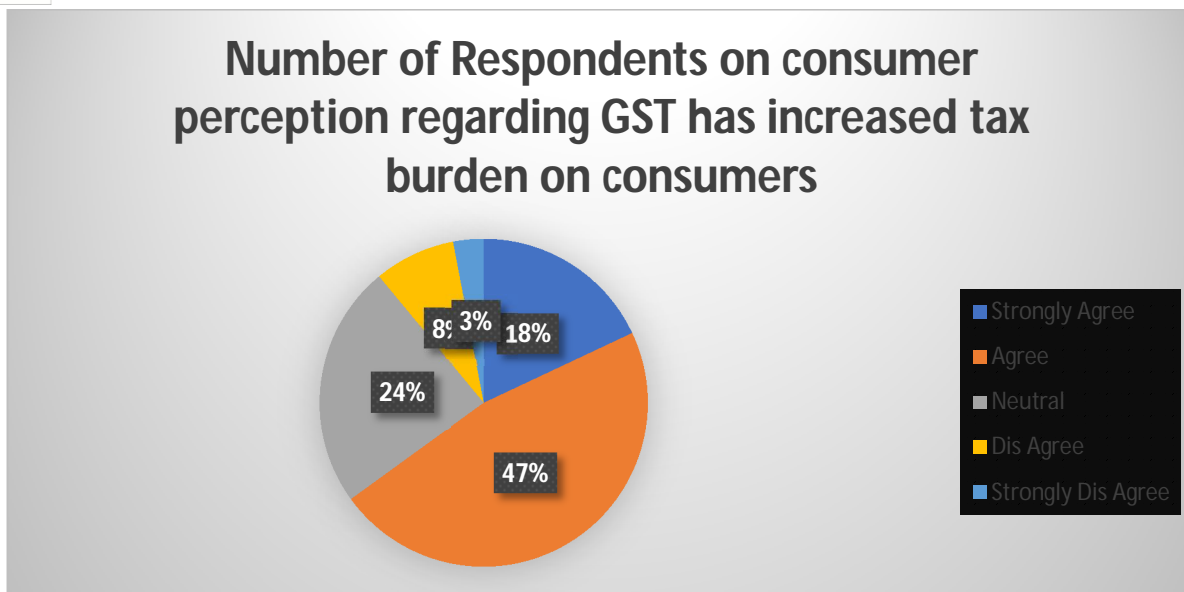

Figure 8: Number of Respondents on consumer perception regarding GST has increased tax burden on consumers.

8) *Interpretation:* According to the above table and graph, it is observed that majority of the respondents 47% are agree with this statement and 24% are neutral and also 18% are strongly agree with this statement. So, it is concluded that majority of the consumers are said GST has increased the tax burden on consumers.

Table 9: Number of Respondents checking the restaurants bill for the GST component

Sl. No	Response	No. of Respondents	Percentage
1	Always	63	63
2	Sometimes	25	25
3	Never	12	12
Total		100	100

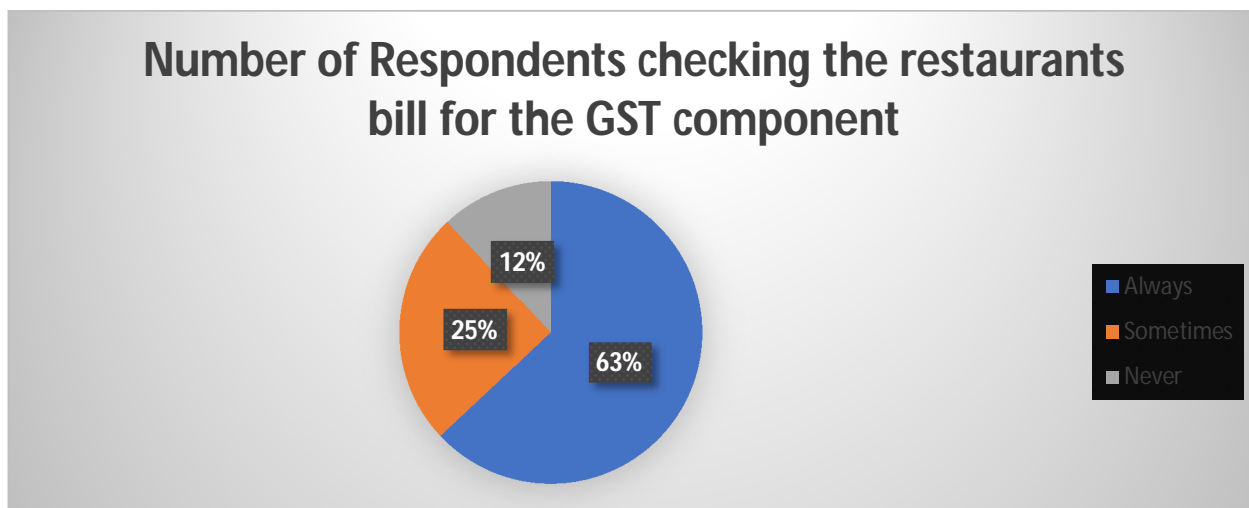

Figure 9: Number of Respondents checking the restaurants bill for the GST component.

9) *Interpretation:* From the above table and graph, out of 100 respondents 63% of respondents always check the restaurant bill for GST component while making the payment. Only 12% of the respondents don't check the bill for GST component while making the payment.

VII. FINDINGS OF THE STUDY

From the above data analysis and interpretations, following are the findings of the study:

- 1) Majority of the respondents are from male category i.e. 63%.
- 2) Most of the respondents falls in the age group of 25 – 60 years i.e. 57%.
- 3) Majority of the respondents (i.e. 45%) are under graduates as their highest level of education qualification.
- 4) Most of the respondents (i.e. 37%) are private institution or organization employees and 28% of respondents are Business people as their occupation level.
- 5) Among all the respondents, majority of the respondents (i.e. 64%) are aware about GST charged in Restaurants.
- 6) Among all the respondents, 42% of the respondents are not satisfied with regard to GST charged in restaurants.
- 7) Majority of the respondents (i.e. 40%) are agreed for the statement of GST is very good tax reforms in India.
- 8) Among all the respondents, 47% of the respondents agreed for the statement that GST has increased tax burden on consumers.
- 9) Majority of the respondents (i.e. 53%) check the restaurants bill for GST component while making the payment.

VIII. CONCLUSION

From the above findings, it can be concluded that majority of the people are aware about GST charged in restaurants including the rate of GST. The rate of GST must reduce since the people feel it is a burden on consumers and most of the consumers are not satisfied with GST rates charged on food, beverages and services in restaurants. People are well aware about GST implementation in India and they feel GST reforms is very good for India in terms of economic development. The government and restaurants need to make few steps to make consumers well aware about GST rates charged on food, beverages and services.
