ChatGPT: Revolutionizing Education Administration-A Case Study Analysis

Mr. Sumit Dattatrey Pawar

Administrative Assistant SNJB's Late Sau. K. B. Jain College of Engineering, Chandwad

Abstract: The advent of Artificial Intelligence (AI) has brought significant advancements in various fields, and the education sector is no exception. Chatbots, specifically those powered by Generative Pre-trained Transformer 3 (GPT-3) technologies, have revolutionized educational administration in recent years. This paper presents a case study analysis along with benefits and limitations of ChatGPT in educational administration. The case study analysis focuses on the implementation of ChatGPT in educational institutions for administrative work. The study highlights the advantages of using ChatGPT, such as improving accessibility, efficiency, and accuracy in administrative tasks, enhancing staff engagement and performance, and reducing the workload of administrative staff. The findings of this study can inform future research and provide insights for educational institutions planning to adopt ChatGPT in their administrative processes.

Keywords: ChatGPT, educational administration, case study analysis, benefits, limitations, staff engagement, staff performance, administrative staff

I. INTRODUCTION

In recent years, the integration of Artificial Intelligence (AI) into education has become increasingly prevalent. One such innovation in AI is ChatGPT (Generative Pre-trained Transformer), a language model developed by OpenAI that uses machine learning algorithms to generate human-like text. ChatGPT has shown promising potential in revolutionizing educational administration by enhancing communication between students, faculty, and administrative staff, as well as streamlining administrative processes.

The purpose of this research paper is to analyze the impact of ChatGPT on educational administration or any administrative sector through a case study analysis. This research paper explores the feasibility and effectiveness of using ChatGPT, a large language model, for the preparation of circulars, office orders, HR policies, translations, or other administrative work.

This paper begins with an overview of ChatGPT technology and its potential applications in the field of education. The literature review highlights recent research studies that have explored the benefits of ChatGPT in administrative settings. The paper then provides a detailed case study analysis of the implementation of ChatGPT in an educational institute, examining the benefits and challenges faced during the implementation process. The case study will be followed by a discussion of the findings and their implications for educational administration. The paper will conclude by outlining the potential future applications of ChatGPT in the field of human resource management and its implications for enhancing faculty or staff administrative efficiency.

II. LITERATURE SURVEY

The use of AI-powered chatbots in education is a relatively new concept, but it has gained traction in recent years.

Table I : Literature Survey

Sr. No.	Year	Author(s)	Paper Title	Main Findings
1	2021	Xu, L., Li, Y., Li, Y., & Jiang, Y.	The Effectiveness of Using Chatbot to Provide Personalized Academic Advice for College Students: An Empirical Study	Chatbot-based personalized academic advice was effective in improving students' academic performance and engagement with academic resources.
2	2021	Wang, X., Chen, Y., Zhang, W., & Ma, L.	Chatbot-based college counseling service: the impact on psychological well-being and perceived accessibility	Chatbot-based counseling service was effective in providing emotional support to students and increasing the accessibility of counseling services.

3	2021	Yoo, J., Jung, Y., & Lee, S.	Evaluation of a Chatbot-Based Academic Counseling Service: A Randomized Controlled Trial	Chatbot-based academic counseling service was effective in providing accurate advice to high school students.
4	2021	Kim, J., Kwon, Y., Kim, S., & Lee, J.	Automatic FAQ Answering System for University Websites Using Chatbot Technology	Chatbot-based automatic FAQ answering systems were effective in reducing the workload of administrative staff.
5	2021	Chen, S., Zheng, S., Xie, J., Wang, H., & Chen, W.	Chatbot empowered education: An artificial intelligence-powered chatbot in K-12 education	Chatbot-based administrative tasks automation was effective in streamlining administrative tasks, allowing teachers to focus more on teaching and improving the quality of education.
6	2020	Liu, Z., Tian, Y., Zhang, X., Wang, X., & Li, J.	Applying Chatbot to Student Record Management in Higher Education	Chatbot-based student record management was effective in accurately identifying and classifying student information, reducing the workload of administrative staff.

III. CASE STUDY : CHATGPT IN ADMINISTRATIVE WORK

The case study approach is used to conduct the analysis. The case study involved the implementation of ChatGPT in an educational institution's academic administration and student record management systems. Data was collected through interviews with administrative staff and students, analysis of system logs, and surveys. The data collected was analyzed using qualitative methods to identify themes and patterns.

Some of the case studies are given, how ChatGPT can be used to enhance administrative task and save time

A. Use of chatGPT in Administrative Work

While using chatGPT formation of query is very important task to get proper and expected output, some of the examples are given below:

1) Circular

 make a official circular on "holiday on 7th April 2023 on the occasion of Good Friday" in college.

 Official Circular

Date: April 5th, 2023

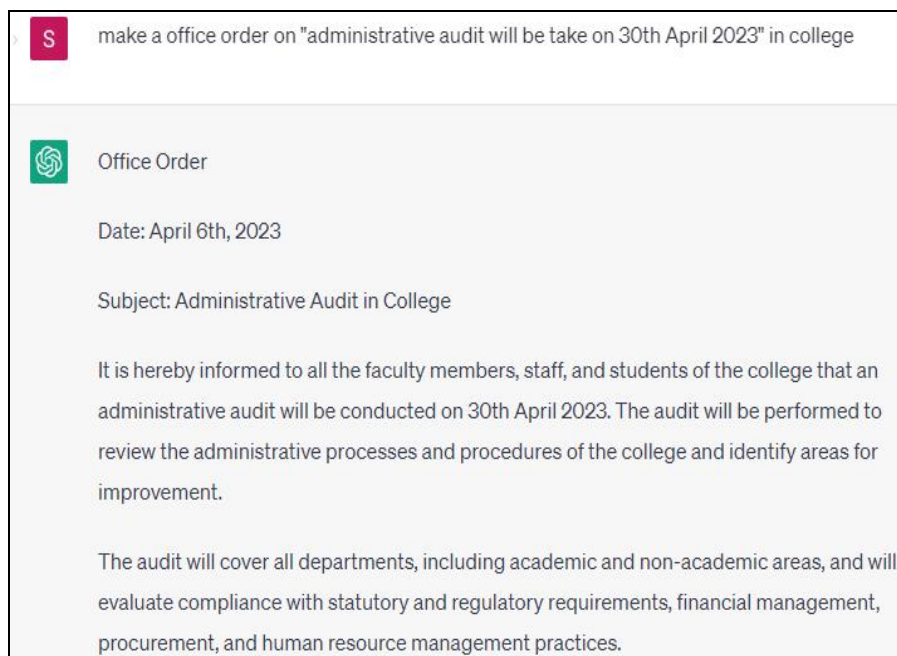

Subject: Holiday on 7th April 2023 on the occasion of Good Friday

It is hereby informed to all the faculty members, staff, and students of the college that a holiday has been declared on 7th April 2023, on the occasion of Good Friday.

The college will remain closed on 7th April 2023, and all academic and non-academic activities scheduled for that day will be rescheduled. The college will reopen on the next working day as per the regular schedule.

Fig 1. Circular for Holiday

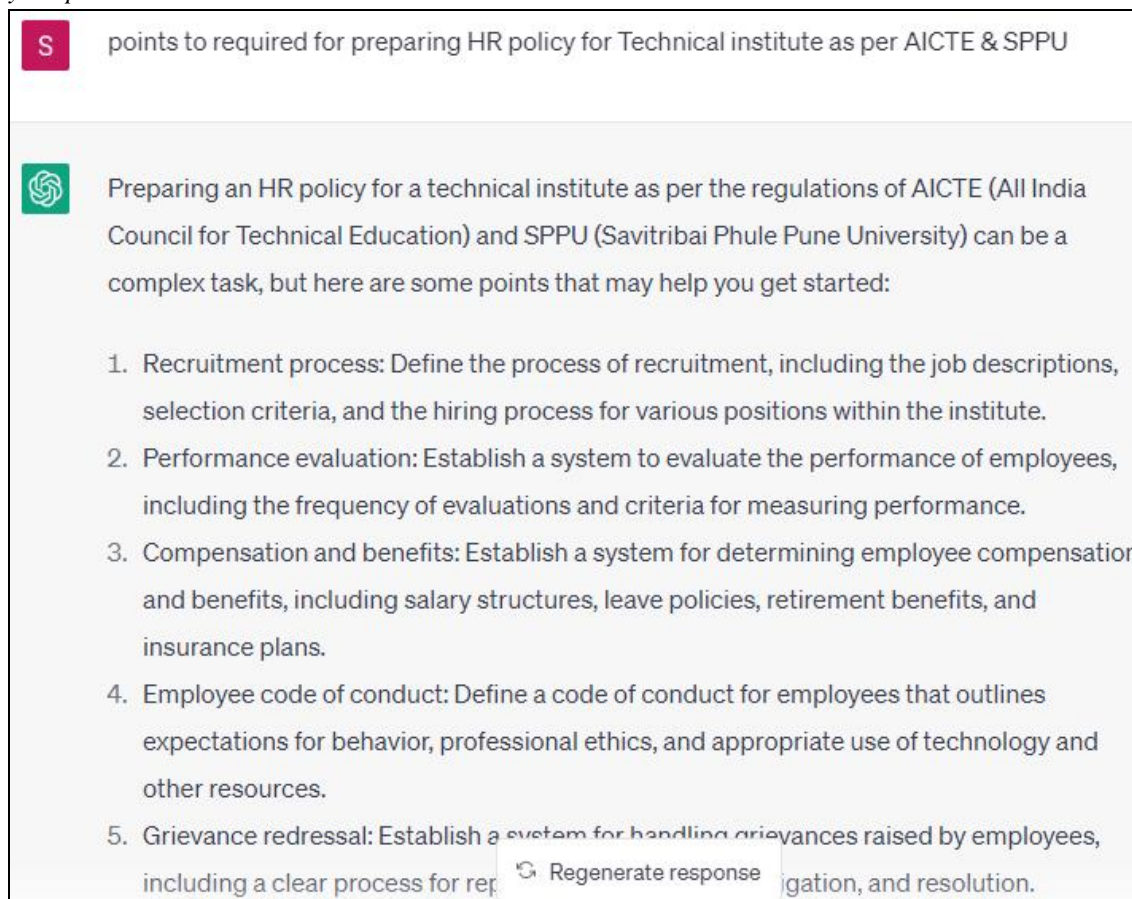

2) Office order

The screenshot shows a document titled "Office Order" with a date of "April 6th, 2023" and a subject of "Administrative Audit in College". The text of the order states: "It is hereby informed to all the faculty members, staff, and students of the college that an administrative audit will be conducted on 30th April 2023. The audit will be performed to review the administrative processes and procedures of the college and identify areas for improvement. The audit will cover all departments, including academic and non-academic areas, and will evaluate compliance with statutory and regulatory requirements, financial management, procurement, and human resource management practices."

Fig 2. Office Order

3) Hr Policy Preparation

The screenshot shows a list of points for preparing an HR policy for a technical institute. The points are:

1. Recruitment process: Define the process of recruitment, including the job descriptions, selection criteria, and the hiring process for various positions within the institute.
2. Performance evaluation: Establish a system to evaluate the performance of employees, including the frequency of evaluations and criteria for measuring performance.
3. Compensation and benefits: Establish a system for determining employee compensation and benefits, including salary structures, leave policies, retirement benefits, and insurance plans.
4. Employee code of conduct: Define a code of conduct for employees that outlines expectations for behavior, professional ethics, and appropriate use of technology and other resources.
5. Grievance redressal: Establish a system for handling grievances raised by employees, including a clear process for registration, investigation, and resolution.

Fig 3. HR policy preparation

4) Text Translation using ChatGPT

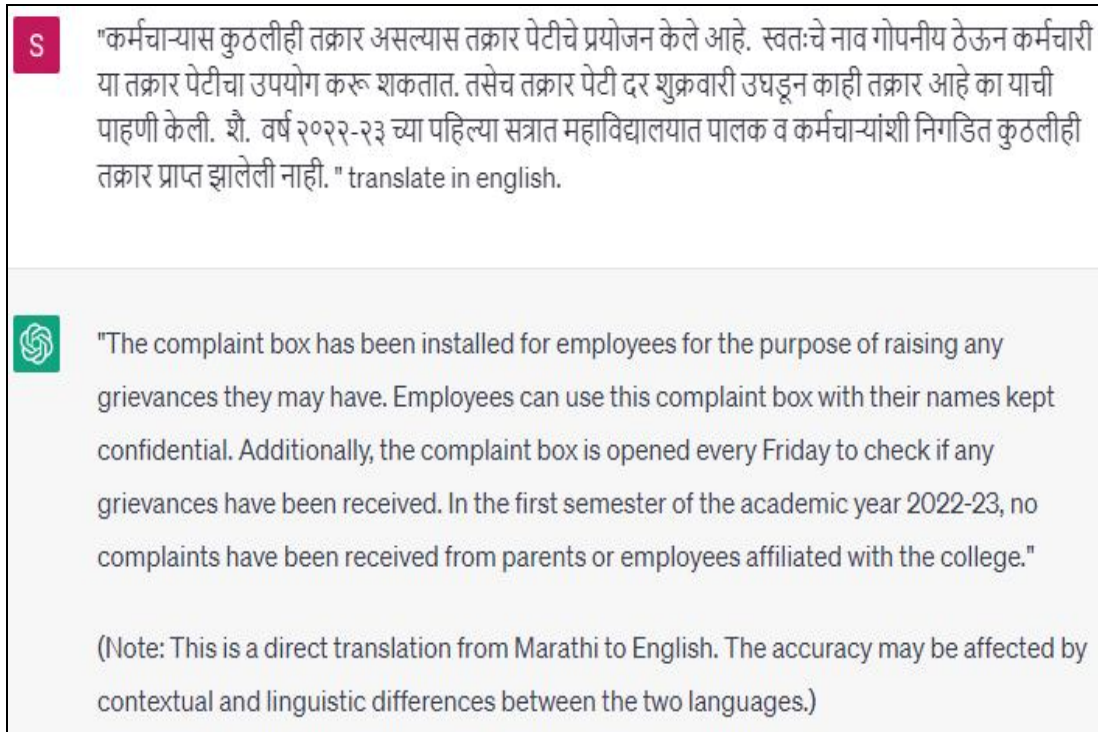

Fig 4. Text Translation using ChatGPT

B. ChatGPT can be integrate with other Google Services

1) Chat GPT for Google Docs

Steps:

- Open Google Docs in your browser and make sure you are signed in to your Google account.
- Go to Extension
- Click on GPT for Sheet and Doc
- Click on Install

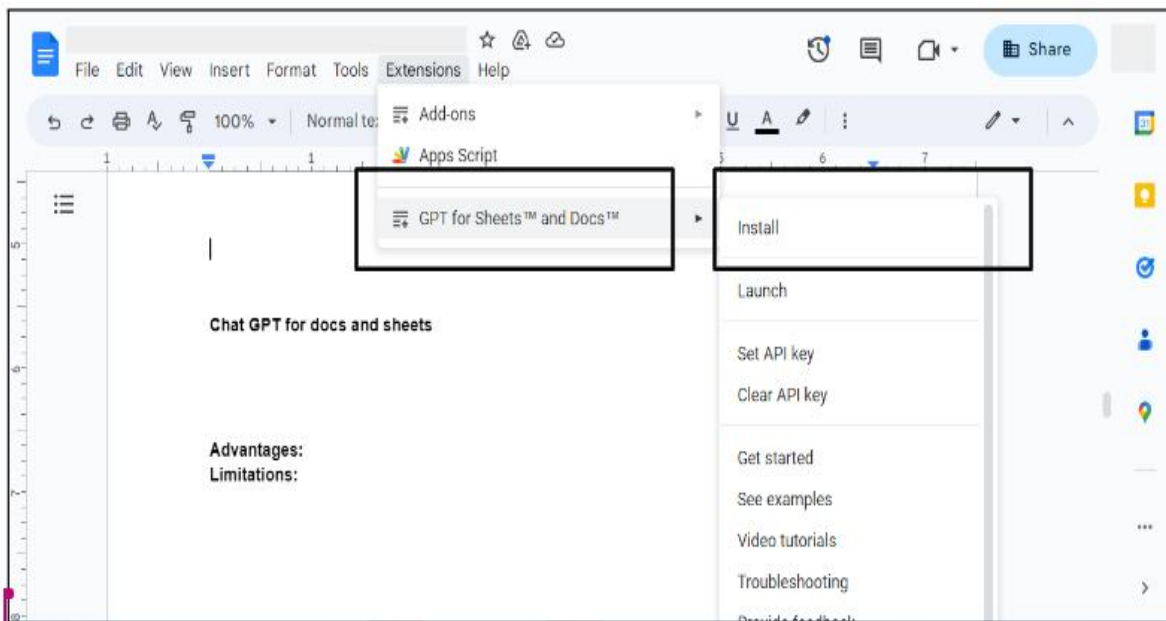

Fig 5. Add chatGPT extension in Google Doc

e) Set API Key

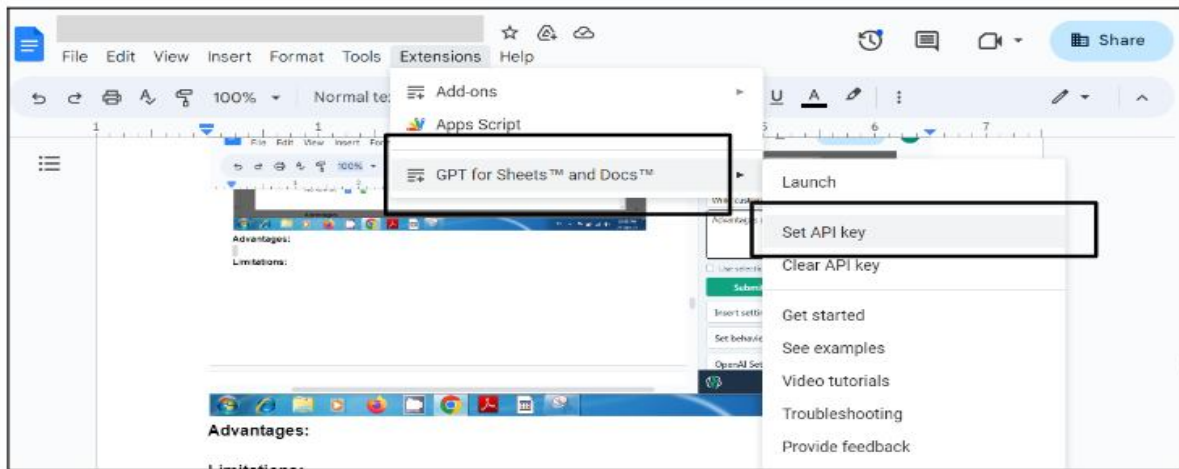

Fig 6. Set API Key

f) Write your query in Custom prompt

Fig 7. Query in custom prompt

2) ChatGPT for Google Sheet

Steps

- a) Open Google Sheets in your browser and make sure you are signed in to your Google account.
- b) Click on Launch & Enable Function Option

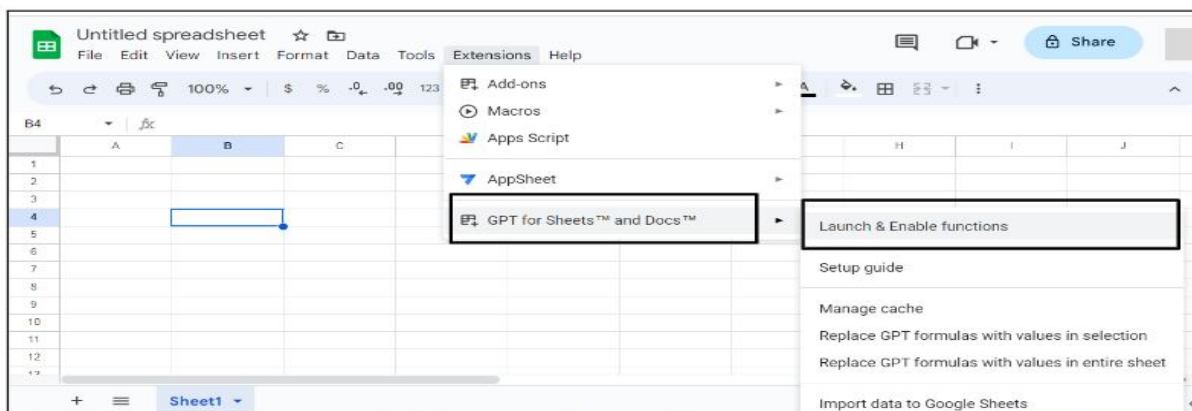

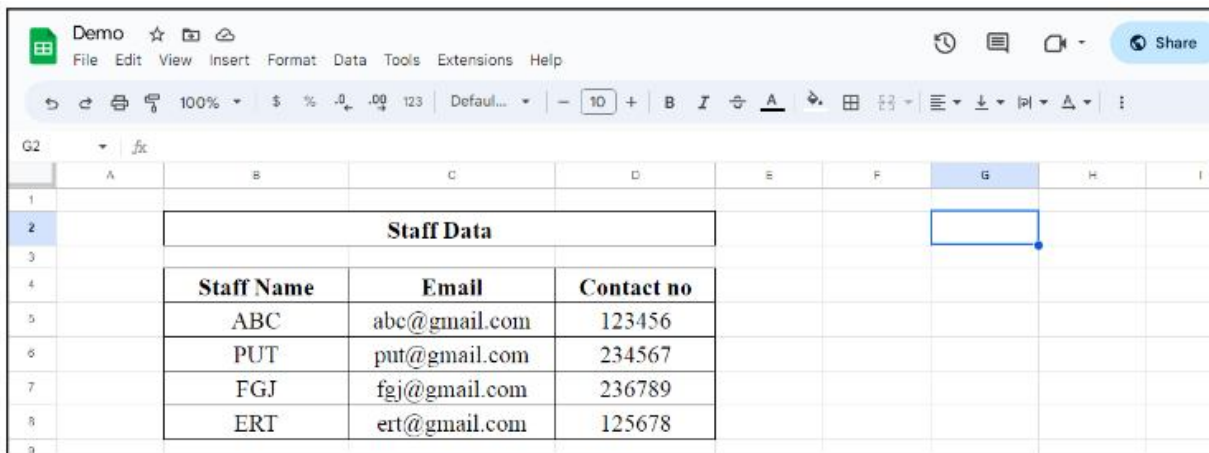

Fig 8. Add chatGPT extension in Google Sheet

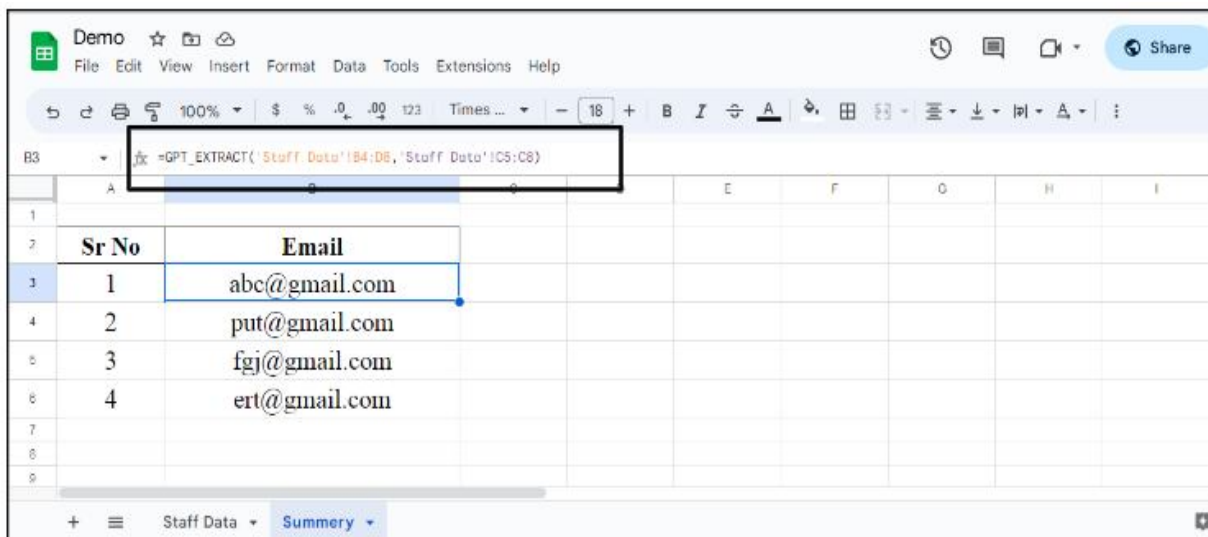

- c) Different Options will be given GPT, GPT_LIST, GPT_FILL, GPT_TABLE, GPT_Extract ect.
- d) Lets apply GPT_EXTRACT query on staff database to extract Email

Staff Data			
Staff Name	Email	Contact no	
ABC	abc@gmail.com	123456	
PUT	put@gmail.com	234567	
FGJ	fgj@gmail.com	236789	
ERT	ert@gmail.com	125678	

Fig 9. Staff Database

Query =GPT_EXTRACT('Staff Data'!B4:D8,'Staff Data'!C5:C8)

The screenshot shows the Google Sheets interface with the formula bar containing the query: `=GPT_EXTRACT('Staff Data'!B4:D8,'Staff Data'!C5:C8)`. The result is a table with two columns: 'Sr No' and 'Email'.

Sr No	Email
1	abc@gmail.com
2	put@gmail.com
3	fgj@gmail.com
4	ert@gmail.com

Fig 9. Apply GPT_EXTRACT query

C. ChatGPT with Email

- 1) Add as extension to browser

Fig 10. Add chatGPT extension for Gmail

2) Write required subject

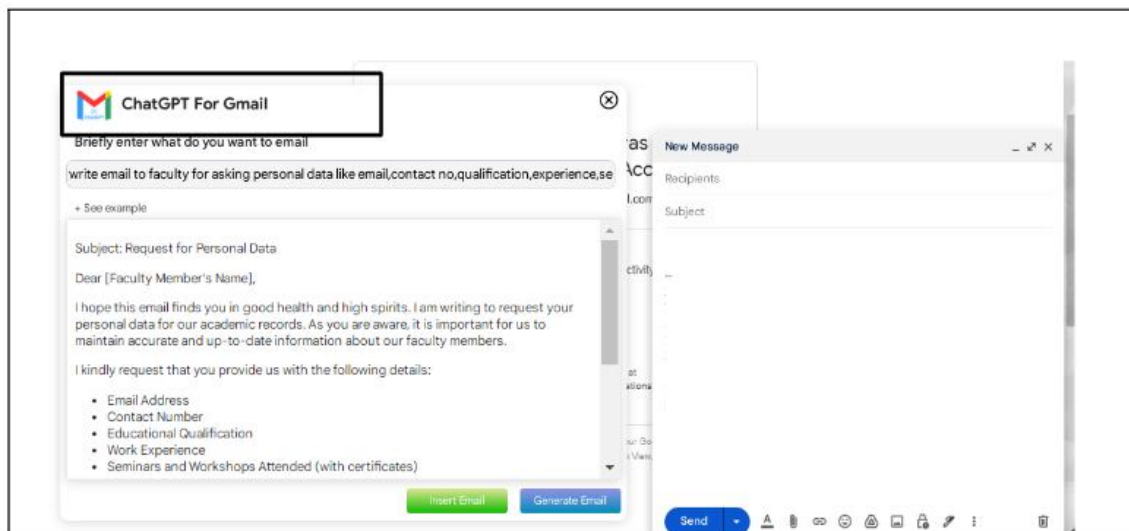

Fig 11. Write query in ChatGPT extension in Gmail

a) *Benefits of using ChatGPT*

Using ChatGPT for preparing circulars, office orders, and other administrative work can offer several benefits, including:

- **Time-saving:** ChatGPT can generate text quickly and accurately, which can save time in preparing administrative documents.
- **Efficiency:** Using ChatGPT can increase the efficiency of administrative work by automating the process of document preparation.
- **Accuracy:** ChatGPT has been trained on a large dataset of text, which can improve the accuracy of the generated text.
- **Consistency:** ChatGPT can ensure consistency in the language and tone used in administrative documents, which can enhance the overall professional image of the organization.
- **Accessibility:** ChatGPT can be accessed from anywhere with an internet connection, which can improve the accessibility of administrative work.
- **Flexibility:** ChatGPT can generate text in various languages, which can provide flexibility in preparing administrative documents for multilingual organizations.

b) *Limitations And Challenges*

Despite the potential benefits of using ChatGPT for administrative work, there are also some limitations and challenges that need to be considered. These include:

- **ChatGPT may generate biased text** based on the dataset it has been trained on.
- **Security:** The use of ChatGPT for administrative work may raise security concerns, as the generated text may contain sensitive information.
- **Quality control:** The generated text may require manual review to ensure that it meets the quality standards of the organization.
- **Legal implications:** The use of ChatGPT for administrative work may raise legal implications related to the accuracy and authenticity of the generated text.

Is chatGPT effect on administrative jobs?

While ChatGPT can automate routine administrative tasks and improve administrative efficiency, there are certain tasks where human expertise and judgment are still required. Here are some ways that administrative staff can stay one step ahead of ChatGPT:

- **Complex problem-solving:** Administrative staff can use their expertise and judgment to solve complex problems that require a deep understanding of the institutional context, policies, and regulations.
- **Personalized Communication:** While ChatGPT can provide quick responses to common queries, administrative staff can offer personalized communication that takes into account the specific needs and circumstances of individual students, faculty, or staff.
- **Human touch:** Administrative staff can offer a human touch that ChatGPT cannot provide, such as empathy, emotional support, and social connections. This is particularly important in areas such as student counseling, academic advising, or career services.

- *Creativity and innovation:* Administrative staff can bring creativity and innovation to their work, such as developing new policies, procedures, or services that improve the institutional effectiveness and responsiveness.
- *Continuous learning:* Administrative staff can continuously learn and update their skills and knowledge to stay up-to-date with the latest technologies, policies, and regulations. This can enhance their ability to work collaboratively with ChatGPT and integrate it into existing administrative processes.

IV. CONCLUSION

In conclusion, the use of ChatGPT for preparing circulars, office orders, and other administrative work can offer several benefits, including time-saving, efficiency, accuracy, consistency, cost-saving, accessibility, and flexibility. However, it is important to consider the limitations and challenges, such as security, quality control, and legal implications. Organizations should evaluate the potential benefits and risks of using ChatGPT and develop appropriate guidelines and protocols for its use in administrative work.
