Abstract: *Tourism is acknowledged to be important for development due to its various factors encompassing economic, social, political, environmental, cultural and psychological characteristics. It is also recognized as one of the world's largest industries, contributing 10% to the global GDP, with enormous potential for further growth. In many countries, especially in the developing countries, tourism has become a major source of foreign exchange earnings emphasizing the need for concentrated and sustained efforts towards its development. . Tourism industry in Maharashtra has a tremendous potential for growth, given the availability of basic infrastructure and the variety of tourist themes offered by various destinations in Maharashtra. Maharashtra has a rich historical and cultural heritage, which has been under-explored by the tourism industry and the government agencies. we are trying to focus one such Pilgrimage Tourist Place "Ramtek" in Maharashtra. Primarily it is a pilgrimage centre also known as kashi of vidarbha for the existence of Ambala lake which is considered as Ganga. Ramtek town observes the yatra three times a year during period of Dashahara, Kartik Purnima and Shriramnavmi which attracts the people from all-around the region to enjoy the same. The number of pilgrims coming to visit yatra was around one lakh at some time, nowadays reduce in thousands. Ramtek pilgrimage is seen under different religions like Jainism, Hindus and Muslims. The water bodies in the form of lakes, baolis (stepped wells) are the part of rituals. Some of these are also termed as 'Ganga', holy water hence deity is placed inside it. Agasthi ashram at Ramgiri has got its historical and religious importance in Ramtek. This dissertation is slimly based on to enhance the tourism potential of the Ramtek and due to this it could be help in growth of town and also could have job opportunities for the people living in the Ramtek town and also we will enhance the existing tourism spots with coordination of religious and leisure tourism.*

Keywords: *Tourism, Economy Development, Pilgrim Town, Heritage*

I. INTRODUCTION

'Ramtek', in Maharashtra bounded by Ramgiri hill, Kaikai hill and several lakes, the city stands for its importance of cultural and religious beliefs and values. Ramtek gained importance due to Ram Mandir which is situated at the crown of Ramgiri hill. The growth of the town, location of important architectural, cultural, religious landmarks and street network has been dictated by the form and presence of several hills and lakes, and Ramgiri hills form the most dominant feature of the landscape. The growth of the town, location of important architectural, cultural, religious landmarks and street network has been dictated by the form and presence of several hills and lakes, and Ramgiri hills form the most dominant feature of the landscape. People have a great belief in the sanctity of the place. Pilgrims come here to bathe in the tank on the day of Chaitra Purnima and Ramnavami when a fair is held. The fair is attended by about 6,000 people coming around. Looking at the rituals performed, this place is of cultural importance. The temple complex needs to be preserved for the pilgrims. The associated Cultural landscape of Ramtek is rich with religious associations, rituals, meanings and places associated with mythological and past events, people, and their history of evolution.

A. Mythological Beliefs

- 1) There are many mythological beliefs attached to the place, it is believed that during the exile period Lord Rama, Sita and Lakshman came at Ramagiri hills to meet sage Agastya and killed a demon Sumbasur and completed his rites at Ambala tank.
- 2) It is also believed that Lord Hanuman while carrying Dronagiri mountain accidentally dropped a piece and thus, Ramtek has lots of medicinal species.
- 3) Poet Kalidasa wrote 'Meghaduta', his poetry in the hills of Ramtek. He described the beauty of the landscape of Ramtek hill in his poetry.
- 4) King Amba's leprosy was cured by the water of Ambala tank which is known as Kashi of Vidarbha. Then, King Ambarish built ghats and temples along the Ambala tank.
- 5) Different temples were built along the tank in different eras. Ambala tank is considered to be the most sacred water source in Ramtek. This water body due to its mythological belief is housing many ritualistic processes such as Pind daan, Asthi visarjan, meditation, etc. It is believed that Lord Ram blessed the water of Ambala with the purity of The Ganges. Thus, people of Ambala bathe and drink this water to purify their body and soul. Due to the architectural richness of the temples around the Ambala tank, this place is also very famous for tourist activities such as boating, photoshoots, etc. Ambala has proved to be a major tourist attraction due to its serenity and sacredness

B. History And Evolution Of Town

Since the early settlement of Jainas on the northwestern foot of the Ramagiri hills hundreds of years ago, the city has witnessed the settlements of many communities such as Hindus and Muslims. It is now recognised as one of Vidarbha's major religious centres for Hindus, Jains, Muslims, and Buddhists, with a significant minority of other ethnicities

MAURYAN PERIOD (265-238 BCE)

- Settlement started on northern side of ramgiri hill

SATTHVANAS PERIOD (250-550AD)

- Settlment started near lakes along hill

YADAVA (12TH CENTURY)

- They built temples
- City grew in assosiation of ram mandir

BHONSLE PERIODE (1738-1803)

- Raghuji bhonsle started fortification around ram mandir , numerous temples built aong ambala lake

BRITISH ERA(1803-1947)

- Build office complexes & railway terminals
- After independence bazar area bus stop and roads were developed

C. Contempeory ERA

Due to growth in population the densification of town happened

II. LITERATURE STUDY

A. Tourism

Tourism means experiencing a culture, location, language, cuisine and activities different than one's own. Tourism has grown from the pursuit of the privileged few to mass movement of people with the urge to discover the unknown, to explore the new and strange places, to seek changes in environment and to undergo new experiences. It is a highly competitive business, dependent on many external factors over which a region or a destination has little or no control. Hence, it is often said that to satisfy tourist expectation within the constraints of a region or a destination and its environment will require both physical and human management strategies. The essence of management plans of tourist regions has to be the wise use of resources and harmonizing these with minimum conflict with the environment. Tourism started as a social phenomenon, but within a short span of time, has grown into a significant economic activity. As an economic activity, tourism is a business both for the individual entrepreneur and the community. It is based on the interrelated system of demand and supply factors. On the demand side are the international, national and local markets. The supply side involves the "tourism product" consisting of attractions, accessibility, facilities and infrastructure. It is an industry with great reliance on attraction and amenities, along with dependence on the goodwill of the local community. Therefore, the distribution of economic benefits has to be more wide spread than in the case of the traditional industry. The approach to tourism planning should move away from the narrow precincts of physical and promotional planning. It should facilitate the growth of tourism to a broader and more balanced approach, recognizing the needs and views of, not only, the tourists and developers but also the wider community. The strategic planning approach to tourism begins at much earlier stage than the determination of development strategy. It begins with an analysis of what has already been achieved, i.e., the critical assessment of various impacts, both positive and negative, of previous tourism development initiatives and an analysis of the political significance of tourism.

1) World Wide Scenario

The Travel and Tourism (T&T) industry directly contributes about 3.6% of the world's Gross Domestic Product (GDP) and indirectly contributes about 10.3% to it. As one of the biggest contributors to the global GDP, this industry directly employs nearly 77 million people worldwide, which comprises about 3% of the world's total employment. The T&T industry also contributes to indirect employment generation to the tune of 234 million or 8.7 % of the total employment implying that one in every twelve jobs in the world is in the tourism industry. The industry also represents about 12% of the total world exports.

2) *India Scenario*

India's share had been 0.8% of the world travel and tourism market. This share has risen from 0.6% in 2001. Despite the growing share of the Asian market, India's total share in world tourist arrivals, however, remains a modest 0.8%, even though international arrivals to India have seen somewhat of a dramatic turnaround since 2002, when a temporary declining trend was reversed aggressively.

This turnaround was the result of several factors such as Government of India's "Incredible India" campaign, high visibility afforded to India by its economic success, the tourism industry's constant search for new destinations, and to some extent improvement in infrastructure in specific areas (such as better air connectivity of smaller and remote destinations). The total foreign tourist arrivals in India in 2005 was around 3.92 million, registering a CAGR of 18.1% over 2002-2005 vis-à-vis world tourist arrivals which registered a growth of barely 4.76% on a larger base.

3) *Maharashtra Scenario*

Tourism industry in Maharashtra has a tremendous potential for growth, given the availability of basic infrastructure and the variety of tourist themes offered by various destinations in Maharashtra. Maharashtra has a rich historical and cultural heritage, which has been under-explored by the tourism industry and the government agencies.

The strong basic infrastructure availability throughout the state would provide a perfect platform for fresh private investments in development of tourism in the state, and in the process creating many direct and indirect employment opportunities to local residents.

Maharashtra had a total tourist arrivals of 9.37 million tourists of which 8.3 million were domestic and 1.07 million were foreign tourists. Maharashtra was ranked second for the foreign tourist arrivals in India accumulating a share of 17.72% close behind Delhi at 21.0%. In the domestic scenario Maharashtra accounted for only 3.95% of the arrivals in India and was ranked seventh. According to the Ministry of Tourism, Government of India, the total tourist arrivals in Maharashtra in the year 2001 was 93,72,327 (say 94 Lakh nos). With the growth rate of 6.72% per year to reach a figure of 344, 05,702 (say 344 Lakh nos.) in the year 2021.

4) *Nagpur Division*

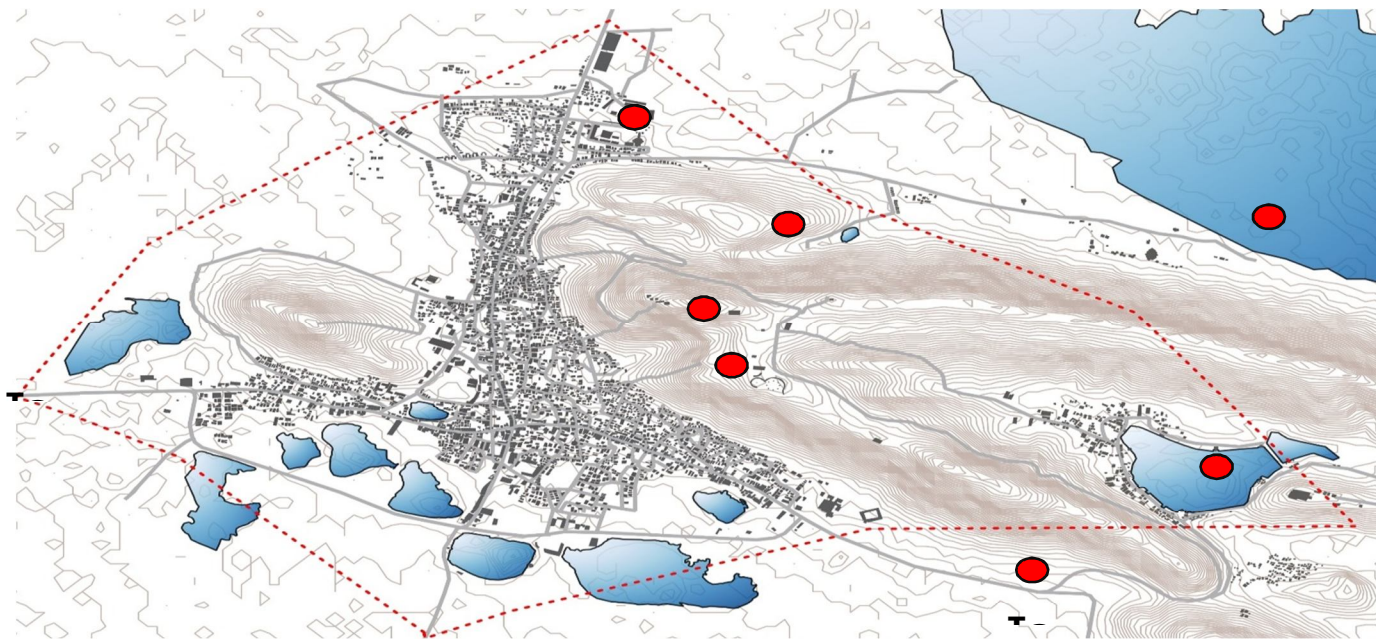

Nagpur City has many distinctions. Popularly called the Orange City, it is the third largest city in Maharashtra. It is also the second greenest in India and is located at the very center of the heartland, almost equidistant from Kolkata, Chennai, New Delhi and Mumbai. Nagpur is a sprawling, seemingly infinite metropolis and is India's primary transport hub with all the nation's main Highways and railways intersecting there.

This city of wide, lush gardens and religious sites is culturally alive, and regularly hosts handicrafts exhibitions, tribal dances, and folkart programmes. Many festivals are celebrated here, including the Kalidas Mahotsav, the Ganesh Utsav and Dhamma Chakra Pravartan Din, Ramnavmi Shobhayatra and Marbat Utsav. Nagpur is one of the largest cities in central India and third largest in Maharashtra after Mumbai and Pune, with a district population of over 4.6 million (as per Census 2011), it is the 9th largest urban agglomeration in India. Nagpur has historically been a major commercial and political center of Vidarbha Region and continues to be so even today.

Its location as the geographical center of the country is physically established by the Zero Mile Marker. This geographic significance of the city endows it with huge logistics related potential. With the increase in population in recent years, the city has expanded beyond its municipal boundaries. This rapid growth has seriously challenged the organized growth of the city and its fringes. This outgrowth needs to be better managed. Growth centers in the fringes of the city, such as MIHAN and other industrial estates

5) *ramtek*

Ramtek is one of those strategically located areas wherein diverse civilization and cultures met in past. The various hills – Kaikai hills, Ramgiri hills, Nagarjun hills, Hidimba hills covers the area. The Sur River and Kapila River flow through the region. This area was very much famous for its natural beauty and also its association with the lord Ram. It is believed that lord Ram had stayed in this area while in exile and took oath of killing demons here in agasthi ashram so it is termed as Ramtek. Due to this mythical association this area started developing as a pilgrimage centre tourism of ramtek is in religious purpose for to attract the tourist on basis of its strong mythological beliefs

III. RAMTEK TOURIST DATA ANALYSIS

A. Ramtek Tourist Projection

Sr.No.	Year	Tourist population
1	2001	2,90,000
2	2011	3,50,000
3	2021	4,35,000
4	2031	5,45,500
5	2041	7,65,500

B. Tourist Influx In Ramtek During December To January 2010

Month	Tourist population
January	20,500
February	19,000
March	20,500
April	79,000
May	23,000
June	20,000
July	20,500
August	20,500
September	20,000
October	60,000
November	29,500
December	20,000

C. Awareness Of Tourist Site

Sr.No.	Places	Tourist awareness
1	outside municipal limit	45
2	Jain temple	27
3	Ambala lake	25
4	Kalidas memorial	52
5	Garh mandir	89

D. Number Of Visitors Based On Tourist Visits

E. Duration Of Stay

F. Origin Of Tourist

The physical distance is the main reason behind tourist influx from different cities and state . The maximum number of tourist inflow is from neighbouring districts . The neighbouring states include Madhya Pradesh , andra Pradesh , chhattishgarh , karantaka ,and gujrath .apart from these some of the tourist come from Orissa and wet Bengal

G. Current Scenario

SR.NO.	Places	People visiting		
		Weekends	Non weekends days	festivals
1	Jain temple	100-300	50-60	
2	Ambala lake	300-400	100-200	Tripur purnima - 60000, ramnavni-1000-2000
3	Kalidas memorial			Kalidas mahotsav - 5000-6000
4	Garh mandir	5000-6000	2000-3000	Ramnavni-50000-60000 Tripur purnima-80000-100000
5	Kapoor baoli	1000-2000	500-700	

IV. RAMTEK DEMOGRAPHIC DATA

V. CONCLUSION

Ramtek is one of the growing town in vidharbha region for its rich historical significance and religious beliefs of people .ramtek as it is growing but also facing many drawbacks due to its very low economic development, as economic development of the society is very important as it helps the area to developed and create job opportunities for the people living in the town. so the major economy generation could be happened due to its tourism as tourism is one of the growing trend in today's scenario it not only help tourist to know or visit different places but also helps people of various tourist places for its income provision for the people living in the area tourism is utmost priority for the under growing towns in India as it helps people of the town for their income provision . so one as the ramtek is lacking in its economic stability so to build ramtek as one of the tourist site which is already existing but for creating such a tourism influence in the site in corporation of religious and leisure tourism in ramtek town could influx in the tourist visit and so can create income provision for the town . Through provision of various activities or tourist places in the town and for the town people.
