V. STEPS IN CONDUCTING A JOB ANALYSIS

A. Stage 1: Identify Tasks Performed

Identify the significant occupation measurements and the undertakings performed for each measurement, the apparatuses and gear used to play out the errands, and the conditions under which the assignments are performed.

1) Gathering Existing Information

- a) Job depictions
 - b) Tasks inventories
 - c) Training Manuals
- ##### 2) Interviewing Subject Matter Experts (SMEs)
- a) SMEs are individuals who are learned with regards to the work and incorporate occupation officeholders, bosses, clients, and upper-level administration.
- ##### 3) Observing Incumbents
- a) During a task examination perception, the work examiner notices occupants playing out their positions in the work setting.
 - b) It lets the work examiner really see the labourer tackle her work and subsequently get data that the specialist might have neglected to make reference to during the meeting
 - c) The strategy's weakness is that it is prominent

4) Job Participation

- a) The method is handily utilized when the investigator has recently played out the work.
- b) A proficient work examiner can likewise play out a new occupation for a brief timeframe, albeit this, obviously, is restricted to specific occupations that include speedy preparing and negligible outcomes from a blunder.

B. Stage 2: Write Task Statements

- 1) An appropriately composed undertaking proclamation should contain an activity (what is done) and an item (to which the activity is finished).
- 2) Often, task explanations will likewise incorporate such parts as where the errand is done, how it is done, why it is done, and when it is finished.
- 3) Once the errand proclamations have been composed (as a rule including exactly 200 undertakings), the following stage is to lead an assignment investigation – utilizing a gathering of SMEs to rate each errand articulation on the recurrence and the significance of the assignment being performed.
- 4) After a delegate test of SMEs rates each assignment, the appraisals are coordinated
- 5) Tasks won't be remembered for the expected set of responsibilities if their normal recurrence rating is 0.5 or underneath. Errands won't be remembered for the last undertaking stock in the event that they have either a normal rating of 0.5 or less on either the recurrence (F) or significance (I) scales, or a normal joined rating (CR) of under 2.
