# The Impact of Social Media on Consumer Behavior and Purchasing Decisions in the Fashion Industry

Diwakar Ray Johari<sup>1</sup>, Dr. R.Thanga Prasath<sup>2</sup>

Nims University Jaipur, Rajasthan

**Abstract:** *The present study aims to examine the noteworthy impact of social media platforms on customer behavior and purchase decisions in the ever-changing fashion business. Fashion marketers now need to grasp how social media usage affects consumer behavior due to its exponential expansion worldwide, especially among fashion-conscious populations. This study investigates the complex relationship between social media involvement and several aspects of consumer behavior, such as brand awareness, brand loyalty, buy intentions, and actual purchase behavior. It does this by conducting a thorough review of the existing literature and doing empirical analysis. Additionally, the study explores the ways in which brand advertising, influencer endorsements, and user-generated material on social media influence customer perceptions and preferences in the fashion industry. This study integrates theoretical understandings with real-world applications is to offer insightful information to fashion firms and marketers who want to improve their social media tactics and gain a competitive edge in a sector that is becoming more and more digital.*

## I. INTRODUCTION

Sure! Social media has completely changed how people shop for clothes. Before, you might see a fashion ad in a magazine or on TV, but now, with social media, you're bombarded with fashion content every time you scroll through your feed.

Here's how it works: You see influencers and your friends posting about clothes they love, and it makes you want them too. It's like getting fashion advice from your peers 24/7. Plus, with platforms like Instagram and TikTok, brands can directly showcase their latest trends and collections to a massive audience.

So, instead of just relying on what's in stores or what traditional advertising tells you to buy, social media lets you discover new brands, see how clothes look on real people, and get inspired by trends from all over the world. It's like having a personal stylist at your fingertips, and it's changing the way we all think about fashion.

become more seamless than ever before. Consumers can now discover a product on social media, explore its features and reviews, and complete a purchase with just a few taps, all within the same platform.

Furthermore, social media enables the formation of virtual communities centered around shared fashion interests. Online forums, Facebook groups, and Instagram communities provide spaces for enthusiasts to discuss trends, seek style advice, and share shopping recommendations. These communities not only amplify brand messages but also serve as valuable sources of consumer insights, helping brands better understand their audience's preferences and behaviors.

## II. INFLUENCING PURCHASING DECISIONS

The influence of social media extends beyond mere brand awareness, significantly impacting consumers' purchasing decisions. Platforms like Instagram and Facebook have integrated shopping features, allowing users to discover and purchase products directly within the app. The rise of shoppable posts, influencer collaborations, and sponsored content has streamlined the path to purchase, blurring the lines between inspiration and transaction.

Additionally, user-generated content plays a pivotal role in shaping consumer perceptions and purchase intentions. Authentic reviews, styling photos, and unboxing videos shared by fellow consumers serve as social proof, validating the desirability and quality of products. As a result, consumers are more likely to trust peer recommendations garnered through social media channels, influencing their willingness to make a purchase

Social media has revolutionized consumer behavior and purchasing decisions within the fashion industry. With the rise of platforms like Instagram, TikTok, and Pinterest, individuals are now exposed to an unprecedented volume of fashion-related content on a daily basis. This constant stream of visual stimuli, coupled with the influence of peers and social media personalities, has profoundly altered the way people discover, evaluate, and ultimately purchase fashion items.

Unlike traditional advertising channels, social media offers a highly personalized and interactive experience. Users can follow their favorite brands, influencers, and friends, creating a curated feed of fashion content tailored to their interests. This direct engagement with brands and fellow consumers fosters a sense of community and trust, making individuals more receptive to marketing messages and product recommendations.

### III. REVIEW OF LITERATURE

- 1) Zarei, M., Darvishi, A., and Aghdaie, M. H. (2020). A thorough review of the impact of social media on fashion consumption behaviour. 57, 102198, Journal of Retailing and Consumer Services. 10.1016/j.jretconser.2020.102198 This comprehensive analysis looks at the multiple ways that social media has an impact on how people consume fashion, including how it affects their preferences, plans to buy, and brand loyalty on different social media platforms.
- 2) Eckhardt, G. M. and Bardhi, F. (2012). Car sharing is an example of access-based consumption. 39(4), 881–898 in Journal of Consumer Research. 10.1086/665377 Through their research on access-based consumption models, such as car sharing, Bardhi and Eckhardt show how consumer behaviour and preferences are influenced by collaborative consumption practices, which in turn cause changes in notions of ownership and sustainability-driven decision-making.
- 3) Pham, N. T., Nguyen, T. T., Bui, T. K. T., & Pham, T. H. (2021). The influence of social media personalities on the purchasing intentions of younger consumers with regard to premium fashion brands. 63, 102724, Journal of Retailing and Consumer Services. 10.1016/j.jretconser.2021.102724-102724 In this investigation of how young customers' purchase intentions towards luxury fashion labels are influenced by social media influencers,
- 4) Banerjee, S.; Chua, A. Y. K. (2016). Social media customer knowledge management: Starbucks's example. Knowledge Management Journal, 20(3), 497–513. JKM11-2015-0476, doi:10.1108 Chua and Banerjee examine how Starbucks uses social media interaction to analyse its customer knowledge management tactics, showing how the coffee giant uses user-generated content, reviews, and online forums to improve brand engagement
- 5) Dahl, S., & Eagle, L. (2013). The impact of social media on marketing strategy. Journal of Applied Business Research, 29(3), 687-692. doi:10.19030/jabr.v29i3.7890 Dahl and Eagle discuss the transformative impact of social media on marketing strategy, outlining key considerations for integrating social media into traditional marketing approaches, including 6 customer engagement, brand storytelling, content curation, and data analytics for targeted marketing campaigns.

Using the AHP and COPRAS-G techniques, factors impacting consumers' purchase decisions are evaluated. doi:10.1007/s40092-013-0033-6 Journal of Industrial Engineering International, 10(1), 1–14 Dehghani & Co. Analyse the elements impacting customers' purchase decisions using the analytical hierarchy process (AHP) and COPRAS-G methodologies..
- 7) Dellaert, B. G. C., van Doorn, J., and Dabholkar, P. A. (2009). The example of the brokerage industry's multiple channel service retailing model. 12(4), 339-356, Journal of Service Research. <https://doi.org/10.1007/s10946-009-3506-4> Multiple channel service is investigated by Dellaert et al. Selling tactics in the brokerage sector, emphasising how social media platforms and other digital channels may improve client interaction, service quality.
- 8) Wu, J., and Fan, Y. (2021). Social media's influence on how consumers interact with fashion brands: The mediating impacts of perceived social media marketing initiatives for brands. 58, 102304, Journal of Retailing and Consumer Services. 10.1016/j.jretconser.2020.102304 In order to show how perceived brand social media marketing activities mediate consumer engagement, loyalty, and purchase intentions, Fan and Wu investigate how social media shapes customer engagement behaviours in fashion brand communities.

### IV. OBJECTIVE OF RESEARCH

- 1) To investigate how social media sites like Facebook, Instagram, and TikTok affect how customers behave in the fashion sector.
- 2) To examine how social media use and purchase decisions are related, including Brand loyalty, impulsive purchasing, and product preferences.
- 3) Investigating how social media influencers, celebrities, and user-generated material affect how customers view fashion businesses and items.

- 4) To look into how various social media marketing techniques (including sponsored posts, influencer partnerships, and user-generated content campaigns) affect customer engagement and intent to buy.

## V. HYPOTHESIS

- 1) H0 - The majority of influencing factors do not significantly affect consumers' decisions to buy clothes via social media sites.  
H1 - The majority of influencing factors have a substantial impact on consumers' decisions to buy clothing via social media channels.
- 2) H0 - Customers' experiences making purchases on social media platforms have no discernible influence on whether or not they recommend social media purchases to others.  
H1: Consumers' experiences making purchases on social media platforms have a big influence on whether or not they promote social media purchases to others.

## VI. SCOPE OF THE STUDY

The purpose of the study is to determine how important social media is to customers' online purchases made on digital platforms. With the development of sophisticated technology, social media has attracted significant interest from the younger generation, who make up a large portion of the market within the fashion sector. The potential future scope of this research can be determined by taking into account the market standards of the apparel business, where social media plays a significant role. Regarding the potential impact of social media on consumer decision-making, the fashion industry enjoys widespread recognition on digital platforms.

- 1) Data Collection: Gather information from social media sites, such as user comments, engagement metrics, photos, videos, and posts. Make that the information gathered is thorough, reflective of the intended audience, and reflects the patterns being studied.
- 2) Methods of Analysis: Utilise suitable analysis methods to make sense of the information gathered. This could involve sentiment analysis of user comments, quantitative study of engagement data, and qualitative analysis of content trends and topics.

## VII. RESEARCH METHODOLOGY

### A. Research Design

Research design comprises the research philosophy, research approach, research strategy, time horizon, techniques, and processes. It also defines the overall framework of the research methodology. The study's research philosophy falls within the positivistic category.

### B. Population And Sample

The population is the totality of the individuals under investigation by the researcher. Stated differently, the population comprises every aspect of the research. The mid-year population estimates state

### C. Data Collection

The questionnaires served as the main source of data for this study.

As a result, target respondents were given surveys both offline and online, and secondary data were acquired by consulting earlier research and other secondary sources.

## VIII. DATA ANALYSIS AND INTERPRETATION

Gender

Response	Frequency	Percentage
Male	16	44
Female	21	56
Total	37	100

## Survey Report

### Gender

37 responses

### Analysis

In Accordance with the table and graph above ,which show 37 replies.44% of the respondents are male, and 56% of the respondents are female.

### Interpretation

There is an not equal number of Male And Female responses, as may be noted

### Age –

Response	Frequency	Percentage(%)
18 - 24	27	72.9
25 - 34	8	21.6
34 - 40	0	0
40 - 45	1	2.7
46 - 55	1	2.7
TOTAL	37	100

### Data Analysis –

from the graph and table. it is observed that out of 37 Responses ,27 respondent is form 18-24 age group with 72.9%,8 respondents are form 24-34 age group with 21.6% ,0 respondent are form with 0%,1 respondent are form 40-45 age group with 2.7%,1 respondent are form 46-55 age group with 2.7%.

### Interpretation

It is observed that most of the respondent are in The age Group of 18-24 Years and the least number of respondents to the age group of 34-40 Years

### Current Age

37 responses

## Education Level -

Responses	Frequency	Percentage(%)
Bachelor's	19	51.40%
Master's	14	37.80%
High School	2	5.40%
Diploma	2	5.40%
Total	37	100.00%

## Survey Report

Highest Qualification  
37 responses

### Analysis-

from the graph and table, it is observed that out of 37 respondent ,19 respondent are Bachelor's with 51.4%,14 respondent are Masters with 37.8%,2 respondent are High School with 5.4% and 2 respondent are diploma with 5.4%

### Interpretation-

It is observed that most of the respondents are Bachelors and the least number of respondents are those who has High school and Diploma

➤ opinion about social media Substance?

Response	Frequency	Percentage
Good	21	56.8
Neutral	16	43.2
Dangerous	0	0
Worst	0	0
Total	37	100

## Survey Report

What is your opinion about social media  
37 responses

### Analysis-

From The above and table, it is observed that out of 37 responses, 21 responses are Good to the opinion About Social Media with 56.8%,16 respondents are Neutral with 43.2%.

### Interpretation-

The majority of people are with good opinion or the majority of people are with neutral or the remaining two points are dangerous and worst with which no one has majority

➤ Social media app you are using in day to day life

Response	Frequency	Percentage
instagram	22	59.5
youtube	9	24.3
facebook	3	8.1
Linkdin,twitter	1	2.7
Snapchat	1	2.7
friends	1	2.7
Total	37	100

### Survey Report

Which social media app you are using in day to day life?  
37 responses

### Analysis-

In Accordance with the table and graph above, which show 37 replies, 22 respondent are using instagram with 59.5%,9 respondent are using youtube with 24.3%,3 respondent people are using facebook with 8.1%,and 1 respondents Peoples are using linkdin,snapchat,friends with 2.7%.

### Interpretation-

It is has been observed most of the respondents are using instgram and the least number of respondents are linkdin,snapchat,friends.

### How does social media perform in your life?

How do social media platform change our life?  
37 responses

### Analysis and interpretation

It has been observed that , majority of the population thinks that change life style,not much changed,we become more aware and get many information and thanThe answer of many people is yes because social media brings changes in lifestyle

## IX. FINDINGS

- 1) The majority of respondents are age 18-24 years, with the least number of respondents to the age group of 34-40 Years
- 2) It is observed that most of the respondents are Bachelors and the least number of respondents are those who has High school and Diploma
- 3) The majority of people are with good opinion or the majority of people are with neutral or the remaining two points are dangerous and worst with which no one has majority
- 4) It has been observed that , majority of the population thinks that change life style,not much changed ,we become more aware and get many information and thanThe answer of many people is yes because social media brings changes in lifestyle

## X. CONCLUSION

The study of Social media's effects on consumer behavior and fashion industry purchase decisions.it is observed that out of 37 Responses ,27 respondent is form 18-24 age group with 72.9%,8 respondents are form 24-34 age group with 21.6% ,0 respondent are form with0%,1 respondent are form 40-45 age group with 2.7%,1 respondent are form 46-55 age group with 2.7%.Moreover, of the 37 respondents, 19 have a bachelor's degree (51.4%), 14 have a master's degree (37-8%), 2 have a high school degree (5.4%), and 2 have a diploma (5.4%).

And than the research was limited to 37 people and focuses on social media platformsn this change, user-generated material is also quite important. Peer evaluations and shared experiences are more trusted by consumers than traditional advertising, which helps firms appear more real and builds a following of devoted patrons. Good visual material is crucial since posts with eye-catching imagery better engage and draw in potential customers.
