Abstract: *Soft skill development programme has been implemented in colleges and universities in India. The moral value created by soft skill development programme among all students in colleges and universities enhances emotional intelligence and inculcate the rational values. Soft skill development programme nurtures the personality development in college students. The vital role of skill development programme lies to perform and to construct a stage or forum between students and society through teachers or mentors. Soft skill is fundamental and type of training education given to students and employers so that they will act as potential carrier of manpower to commercial and market scenario. The human skill works mainly through intellectual and emotional level; if a skill based education is given to students in their early level definitely it completes the needs of society. Hard and soft skill based training gives a bright future to student's life through management of different things and soft skill components like time, communication, presentation, skill to establish and maintain interpersonal relationships. It increases positivity and adaptability among students, as a result soft skill development programme provides a tool to live and livelihood to students at an early stage for their life.*

Keywords: *Soft skill development programme, training, hard and soft skills, higher education, presentation skill etc.*

I. INTRODUCTION

Soft skills are people's skills or personality skills. Soft skills are "non-technical, intangible, personality specific skills" which determines the individual strength as leader, listener and negotiator [1]. Soft skills are the traits and abilities of attitude and behavior rather than of knowledge or technical aptitude [2]. Skill development programme has two main coins viz; skills which are soft and hard in nature. There are different soft skill components like oral or spoken skills, written communication, honesty, teamwork, self-motivation, work ethic, critical thinking, risk taking, flexibility or adaptability, leaderships, interpersonal, questioning skills, creativity, influencing skills, research skills, organization skills, problem solving skills, multicultural skills, computer skills, academic skills, detail orientation, qualitative and quantitative skills, teaching or training skills, time management, ability to analyze strength and weakness[3]. In development of soft skills and hard skills, many of the soft and hard skills parameters are under considered like communication skill, teamwork skill, interpersonal relationships, meeting management skills, facilitating skills, selling skills, leadership skill, mentoring skills, presentation skills, self-management skills, growth management, self-awareness, emotion regulation, self-confidence, stress management, resilience, skills to forgive and forget, patience, persistence and perseverance, perceptiveness and SWOT analysis.
