INTERNATIONAL JOURNAL FOR RESEARCH IN APPLIED SCIENCE AND
ENGINEERING TECHNOLOGY (IJRASET)

Bibliometric Analysis of the Indian Journal of Agronomy for the year 2003-2013

Vijayanathan.R1, Kaliyamoorthi.P2

1 Senior Librarian and Head, Department of Library & Information Science,
2 Assistant Professor, Department of Computer Science & Engineering
Cauvery College of Engineering and Technology, Trichy. 639 103 (Tamilnadu)

Abstract: *Bibliometrics/Scientometrics are one of the ways to measure the literature explosion. References appended to the articles of source journal Agriculture University library, Coimbatore "The Indian journal of agronomy". The present study is also intended to identify the growth and authorship pattern of productivity of articles. It was observed from the study that the year 2008 was most participating year during the study period 2003 - 2013. The Relative Growth Rate (RGR) was high in terms of literature productivity and Degree Collaboration (DC) was also high in terms authorship pattern i.e., 1104 out of 1226 (0.900) and many more features were identified*

Key terms : *Bibliometrics, Relative Growth rate, ranking list of crops*

INTRODUCTION

Bibliometrics is a relatively new subject or branch of science. It is interdisciplinary research method which utilizes quantitative analysis and statistics to describe patterns of publication with in a given field or body of literature. The basic units of Bibliometrics are all facets of written communications, such as, primary and secondary periodicals, articles and abstracts published in them, bibliographies of articles, books, monographs and other media of communication [Sengupta,1985]. It has sound theoretical base with contribution from Pritchard, Lotkas, Gross, Bradford, Zipf, Garfield, Vickery and many others. The present study relates to Bibliometrics analysis of 1226 articles published in Indian journal of agronomy journal from 2003 to 2013. The data is analyzed to know the authorship pattern, degree of collaboration and Geographical distribution of papers.

OBJECTIVE

The objectives of the present study are to find the following

1. Year-wise distribution of paper
2. Authorship Pattern with degree of collaboration
3. Geographical distribution of paper
5. Institution wise distribution of paper
6. Ranking list of Crops

METHODOLOGY

The present study is related to Bibliometric analysis of 1226 articles published in Indian journal of agronomy journal to evaluate the research publication of Indian society of Agronomy in the field of science and Technology. Authorship pattern, The degrees of collaboration of authors, geographical distribution number of references and the number of pages manually and tabulated for necessary data, finally all the collected data were analyzed for making the observations. As agronomy is a multidisciplinary subject that includes a number of interrelated fields to the fore white targeting to address a particular piece of problems .In certain cases expert comment is sought while deriving the subject of contributions. On Indian journal of agronomy journal and cover the period from 2003 to 2013, to the data for analyzing the present study.

SCOPE AND COVERAGE OF THE STUDY

The present study to find out the pattern of information used by the journals in the field of science subject. The study is based on the references appended to Indian journal of agronomy journals by the department of Agronomy , University library, Agriculture University, Coimbatore during 2003-2013.

IJA Bulletin has been selected as the source journal. It is a quarterly research journal of the Indian Journal Agronomy and is devoted to the advancement and dissemination of the fundamental and applied knowledge of library and information science. The "INDIAN JOURNAL OF AGRONOMY" comprises of research articles on the applied aspects of Soil – Water - Environmental relationship on Different crops and short

INTERNATIONAL JOURNAL FOR RESEARCH IN APPLIED SCIENCE AND ENGINEERING TECHNOLOGY (IJRASET)

communications of scientists. The contribution to this journal mostly belongs to the Indian community. The views expressed by them closely suits to the Indian environment. The progress is charged through developments seen in the developed countries. Therefore, the journal has been chosen for the purpose of the study. The period covered in this study is from 2003-2013.

DATA ANALYSIS

For the purpose of this study, the Bibliographical data was collected from agriculture university library, Coimbatore for the period of 2003 to 2013. Collected data were statistically analyzed, calculated, tabulated and presented by using RGR method, K. Subramanian's formula for Degree of Collaboration for its growth rate of the literature, author contribution and their collaboration, ranking list crops growth and its grey areas etc.

Table 1: Year wise Distribution of Paper

Sl no.	Year	Articles	Percentage
1	2003	72	05.87
2	2004	71	06.61
3	2005	64	05.22
4	2006	143	11.66
5	2007	158	12.89
6	2008	99	08.07
7	2009	96	07.83
8	2010	151	12.32
9	2011	138	11.26
10	2012	125	08.56
11	2013	119	09.71
Total		1226	100

The table represents the year-wise distribution of articles published in The Indian society of agronomy Journal . It shows that details regarding the distribution of 1226 articles published from 2003-2013. Maximum 158 (12.89 %) articles was published in 2007 and minimum number of contributions i.e., 64 (05.22%) in the year 2014.

Table 2: Author-wise Distribution of Paper

Authorship pattern	Year 2003-2013											Total	%
	03	04	05	06	07	08	09	10	11	12	13		

Single author	7	2	6	15	16	13	11	11	15	13	13	12	9.95
Two author	25	43	30	70	76	40	33	60	38	37	52	50	41.11
Three author	24	16	11	33	45	32	29	50	48	35	32	35	28.95
Four author	12	17	9	17	18	12	18	20	29	13	13	17	14.52
Five author	4	3	5	7	2	2	5	7	8	7	8	58	47.31
Six and above	-	-	3	1	1	-	-	3	-	-	1	9	0.73
Total	72	81	64	144	151	99	96	151	138	125	119	1226	100

The findings of authorship pattern in Agronomy literature reveal the following facts. The two author's paper first in order (41.11%) where as three author's paper obtains the second order of priority (28.95%) the four author's paper records the third order of priority (14.52.95%). The present study analyses the research papers contributed by author to ten authors. It is noticed that the number of contributions from 5 to 10 authors has been reduced. The volume wise analysis indicates that two author's paper record a predominant category in all years of publication.

Table 3: Authorship pattern with Degree of Collaboration

Year	Volume	No. of Authors		Total	Degree of collaboration
		Single	Multiple		
2003	48	7	65	72	0.902
2004	49	2	79	81	0.975
2005	50	6	58	64	0.906
2006	51	15	128	143	7.888
2007	52	16	142	158	0.898
2008	53	13	86	99	0.868

INTERNATIONAL JOURNAL FOR RESEARCH IN APPLIED SCIENCE AND ENGINEERING TECHNOLOGY (IJRASET)

				2	1			0	9	6				2		13	Sugarcane	11	26	2.12	937	76.42
														6		14	Green Gram	12	23	1.88	960	78.30

Out of 1226 contributions of the study period during 2003 - 2013, it was observed that there were 27 state had contributed towards the subject field. Among them, Utta Pradesh was the highest contributor during the study period i.e., 271 (17.69%) and according to the study that the year 2005 was remarkable year in terms of articles productivity

Table 5: Institution-wise Distribution of Paper

Institution	No. of authors	Percentage
Academic institution	670	54.65
Research Institution	352	28.71
Special institution	204	16.64
Total	1226	100

The table shows institution wise distribution of contributions of this Indian Journal of agronomy. Out of 1226 contributions, the highest number, i.e., 670 (54.65%) has been contributed by Academic Institution and lowest number, i.e., 204 (16.64%) has been contributed by Special Institution.

Table 6 :Ranking lists of most frequently cited crops

s.no	Name of the crops	Rank	No. of crops	%	Cum no. of crops	Cum.%
1	Rice	1	193	15.74	193	15.74

CONCLUSION

The present study is related to Bibliometrics analysis of articles published in Indian society of agronomy journal from 2003-2013. The study has analyses various aspects such as authorship Pattern, degree of collaboration among the authors and geographical distribution of papers. The year-wise distribution of articles in Indian journal of agronomy journal shows that the highest number 158 (12.89%) total output 1226 have appeared in the year 2003 & 2013. Maximum number of articles is 504 (41.11%) have been contributed by Two authors. This shows that single author research work were low among the contribution made to the Indian journal of agronomy journal. This has been further testified with the degree of collaboration. The degree of collaboration in Indian journal of agronomy journal is 0.900 which clearly contribution

Author Biography

INTERNATIONAL JOURNAL FOR RESEARCH IN APPLIED SCIENCE AND ENGINEERING TECHNOLOGY (IJRASET)

Vijayanathan.R. received his Master of philosophy Library and Information Science from Annamalai University in 1999 Also he obtained his post-graduate degree in Master of Economics in Bharathidasan University in 1996.He is working as a Sr. Librarian, Department of library and Information Science in Cauvery College of Engineering and technology, Trichy from 2009.

He has published 7 research papers in National and International journals. His areas of interested are Networking; Cloud computing, IC Technologies, Library Automation, Webometric study, Scientometric study, Bibliometric analysis, and citation study

Co -author Biography:

Kaliyamoorthi Perumal received the BE and ME degrees in Computer Science and Engineering from Anna University, Chennai, India, in 2009 and 2013, respectively. He is currently working as an Assistant Professor in the Computer Science and Engineering Department at the Cauvery College of Engineering and Technology. His research interests are in the areas of security and privacy in cloud computing, and wireless security.
